Transplantation of High Risk Donor Livers

Machine Perfusion Studies To Improve and Predict Post
Transplant Hepatobiliary Function

Yvonne de Vries

Different parts of this thesis and PhD research were financially supported by the following institutions and companies:

University of Groningen
Groningen University Institute for Drug Exploration
Graduate School of Medical Science
Organ Assist
HbO₂ Therapeutics
Nederlandse Transplantatie Vereniging
Nederlandse Vereniging voor Hepatologie
Leo Pharma B.V.

Transplantation of High Risk Donor Livers

Machine Perfusion Studies To Improve and Predict Post
Transplant Hepatobiliary Function

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 14 oktober 2020 om 14.30 uur

door

Yvonne de Vries

geboren op 15 juli 1991
te Heerenveen

Promotores

Prof. dr. R.J. Porte
Prof. dr. J.A. Lisman

Beoordelingscommissie

Prof. dr. H. J. Metselaar
Prof. dr. D. Monbaliu
Prof. dr. R. K. Weersma

Paranimfen

Wilco de Vries
Tessa Vollbehr

Table of contents

- Chapter 1** Introduction and Aim of This Thesis
- Chapter 2** Liver Transplantation in Groningen, The Netherlands : A Single Center Status Report
Clin Transpl. 2015;31:101-111.
- Chapter 3** Post-transplant Cholangiopathy: Classification, Pathogenesis, and Preventive Strategies
Biochim Biophys Acta Mol Basis Dis. 2018 Apr;1864(4 Pt B):1507-1515.
- Chapter 4** Biliary Bicarbonate, pH and Glucose Are Suitable Biomarkers of Biliary Viability During Ex Situ Normothermic Machine Perfusion of Human Donor Livers
Transplantation. 2019 Jul;103(7):1405-1413
- Chapter 5** Transplantation of high-risk donor livers after resuscitation and viability assessment using a combined protocol of oxygenated hypothermic, rewarming and normothermic machine perfusion: Study protocol for a prospective, single arm study (DHOPE – COR – NMP Trial)
BMJ Open. 2019 Aug 15;9(8):e028596
- Chapter 6** Pretransplant Sequential Hypo and Normothermic Machine Perfusion of Suboptimal Livers Donated after Circulatory Death Using a Hemoglobin-based Oxygen Carrier Perfusion Solution
Am J Transplant. 2019 Apr;19(4):1202-1211
- Chapter 7** Transplantation of high-risk donor livers after ex situ resuscitation and assessment using combined hypo- and normothermic machine perfusion: A prospective clinical trial
Annals of Surgery 2019 Nov;270(5):906-914
- Chapter 8** Dual Versus Single Oxygenated Hypothermic Machine Perfusion of Porcine Donor Livers: Impact on Hepatobiliary and Endothelial Cell Injury
Submitted for publication
- Chapter 9** Letter to Editor: *Ex situ* normothermic machine perfusion of donor livers using a hemoglobin-based oxygen carrier: a viable alternative to red blood cells
Transpl Int. 2018 Nov;31(11):1281-1282.
- Chapter 10** Summary, Discussion and Future Perspectives
