Methylation analysis for the identification of cervical lesions to improve cervical cancer screening in a Chinese population

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 21 October 2020 at 14.30 hours

by

Na Li

born on 16 September 1982
in Hebei, China

Supervisors
Prof. A.G.J. van der Zee
Prof. E. Schuuring

Co-supervisor
Dr. G.B.A. Wisman

Assessment Committee

Contents

Chapter 1 General Introduction 9

Chapter 2 DNA methylation markers as triage test for the early identification of cervical lesions in a Chinese population 27

Submitted for publication

Chapter 3 DNA methylation markers for triaging high-risk human papilloma virus-positive women in early cervical cancer screening: a systematic review 51

Submitted for publication

Chapter 4 ZNF582 methylation as a potential biomarker to predict cervical intraepithelial neoplasia type III/worse: A meta-analysis of related studies in Chinese population 85

Medicine (Baltimore). 2019.Feb;98(6):e14297.

Chapter 5 PAX1 and ZNF582 methylation analysis and improvement of cervical cancer screening 103

Manuscript in preparation

Chapter 6 Summary 129

Chapter 7 General Discussion and future perspectives 135

Chapter 8 Chinese summary 155

Nederlandse samenvatting (Dutch summary) 159

Curriculum vitae 166

List of publications 167
