Performance-enhancing strategies for deceased donor kidneys

Geert van Rijt

2014

The studies in this PhD thesis were funded by:

Research school GUIDE, University of Groningen
Junior Scientific Masterclass, University of Groningen
Araim Pharmaceuticals
Jan Kornelis de Cock foundation
University of Aarhus
European Society for Organ Transplantation
Danish kidney foundation
Helen and Ejnar Bjørnow Foundation

The printing of this thesis was financially supported by:

Tranasonic B.V.
ChipSoft B.V.
Mundipharma Pharmaceuticals B.V.
Noord negentig
Med-Assist B.V

Performance-enhancing strategies for deceased donor kidneys

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 29 oktober 2014 om 16.15 uur

door

Willem Gerard van Rijt

geboren op 22 januari 1987
 te Voorst

Promotores

Prof. dr. R.J. Ploeg
Prof. dr. H. van Goor

Copromotor

Dr. H.G.D. Leuvenink

Beoordelingscommissie

Prof. dr. J.L. Hillebrands
Prof. dr. C.A.J.M. Gaillard
Prof. dr. A. Bader

Paranimfen

Pieter-Paul Hekking

Contents

| | |
|---|------------|
| Chapter 1 | 9 |
| General introduction | |
| Chapter 2 | 19 |
| Triphasic response of glomerular filtration rate after experimental brain death in pigs | |
| <i>Submitted</i> | |
| Chapter 3 | 39 |
| α -melanocyte stimulating hormone treatment in pigs does not improve early graft function in kidney transplants from brain dead donors | |
| <i>Public Library of Science - ONE</i> | |
| Chapter 4 | 61 |
| The effect of normothermic recirculation before cold preservation on post-transplant injury of ischemically injured donor kidneys | |
| <i>Transplant International</i> | |
| Chapter 5 | 77 |
| Low-dose ARA290 treatment of brain dead donors does not improve renal function in an isolated perfused kidney model | |
| Chapter 6 | 93 |
| Renoprotective capacities of non-erythropoietic EPO derivative, ARA290, following renal ischemia/reperfusion injury | |
| <i>Journal of Translational Medicine</i> | |
| Chapter 7 | 109 |
| ARA290, a non-erythropoietic EPO derivative, attenuates renal ischemia/reperfusion injury | |
| <i>Journal of Translational Medicine</i> | |

| | |
|---|------------|
| Chapter 8 | 125 |
| Transgenic EPO receptor knock-out does not affect renal ischemia/reperfusion injury | |
| Chapter 9 | 137 |
| Erythropoietin-mediated protection in kidney transplantation: nonerythropoietic EPO derivatives improve function without increasing the risk of cardiovascular events | |
| <i>Transplant International</i> | |
| Chapter 10 | 153 |
| Functional EPO gene polymorphism rs1617640 affects graft survival after deceased donor kidney transplantation | |
| <i>Submitted</i> | |
| Chapter 11 | 173 |
| Summary, discussion and future perspectives | |
| Nederlandse samenvatting | 185 |
| List of abbreviations | 192 |
| Author affiliations | 194 |
| List of publications | 196 |
| Acknowledgements | 199 |
| Biography | 205 |
