The Song of Hannah in 1 Samuel 2—Logotechnical Analysis

Guidelines

- Please read the General Introduction and the Introduction to the Embedded Poetry.
- For common features found in the numerical analysis charts, see Key to the charts.

The Literary Context of the Song of Hannah: 1Sam. 1:1-2:11

- The literary context framing the Song of Hannah is the story of Samuel's birth and childhood until his mother made him over to YHWH. The framework, 1 Sam. 1:1-2:11, is a masterpiece of numerical composition. The following survey of its numerical features shows that it was meticulously composed step by step according to the different scenes in the story by means of significant structuring numbers: the numerical values of the names Samuel (53), Elkanah (51), and Hannah (27), and the divine name number 17. This also holds true for the words spoken by Elkanah, Eli, and Hannah.

1:1-3 The setting of the stage 53 words \((7 \times 17) = 21+13+6+1+12 = 53\)
1:2-3 The situation at Shiloh 34 \((2 \times 17)\) words
1:4-6 Peninnah and Hannah 34 \((2 \times 17)\) words
1:4-8 Elkanah and his wives 51 in narrative \((7 \times 17) + 1+12+19+14+5 = 51\)
1:7-8 Elkanah comforts Hannah 32 words \((kbwd = 20+2+6+4 = 32)\)
1:9-11 Hannah's vow 53 words \((7 \times 17) = 21+13+6+1+12 = 53\)
1:12-14 Eli rebukes Hannah 34 \((2 \times 17)\) words
1:15-16 Hannah's response 32 words \((kbwd = 20+2+6+4 = 32)\)
1:17-18 Eli rehabilitates Hannah 27 words \((7 \times 17) = 8+14+6 = 27\)
1:19 Back home in Ramah 17 words
1:19-20 Samuel's birth 31 words \((7 \times 17)\)
1:21-23 Hannah nurses her son 54 words \((2 \times 27)\)
1:19-23 Samuel's childhood 85 \((5 \times 17 = 53 + 32)\) words
1:24 Hannah takes him to Shiloh 17 words
1:25-27 Hannah pays her vow 34 \((2 \times 17)\) words
1:28 Hannah makes Samuel over 14 words
1:21-28 The family at Shiloh 119 \((7 \times 17)\) words
1:21-2:1a + 11 The framework 136 \((8 \times 17)\) words.

Here is a survey of the words in the speeches:

Elkanah: 15 \((v. \ 8) + 12 \ (v. \ 23) = 27\) words \((7 \times 17) = 8+14+6 = 27\)
Eli: 7 \((v. \ 14) + 10 \ (v. \ 17)\) = 17 words in total
Hannah: 26 \((v. \ 11) + 29 \ (vs. \ 15-16) + 4 \ (v. \ 18) + 12 \ (v. \ 22) + 36 = 107,\) (that is 55 words in distress and 52 \((2 \times 26)\) no longer downcast)
Hannah's Song 113 \((2:1b-10),\) which gives the grand total of 220 words \((20 \times 11,\) the number of fulfilment we encountered in the Song of Deborah).

This is the setting of the Song in its wider context, 1:21-2:11:

1:21-28 Narrative about Samuel's family in Shiloh 119 \((7 \times 17)\) words
2:1a Introduction to the Song of Hannah 3 w.
2:1b-10 The Song of Hannah 113 w. \(\{\) 130 w.
2:11 Conclusion of the story of Samuel's nativity 14 w.
1:21–2:1a + 11 The direct narrative framework has in total 136 \((8 \times 17)\) words.

The number of words in the Song, 113, and its direct framework, 17 \((3 + 14),\) was deliberately chosen to achieve the marvellous number 130 \((5 \times 26)\).
This striking numerical evidence raises the question whether the Song is to be regarded as an inset hymn that was transferred from its original Sitz im Leben and inserted into the story of Samuel’s nativity. As far as I could check, this is the commonly held view among scholars, even though they readily concede that the Song is not wholly unsuited in its presumed secondary context. Scholars do recognize that the Song has not inappropriately been placed on Hannah’s lips, but they fail to draw the only correct conclusion, namely that it was specifically composed to suit its present context. In my opinion, Hannah’s Song is integral to Samuel’s nativity story and contemporary with the literary personage she represents.

What applies to the Song at the Reed Sea in Exodus 15, the Song of Moses in Deuteronomy 32, and the Song of Deborah in Judges 5, also holds true for the Song of Hannah. It was composed along with its literary context as an embedded hymn. This Song is so intimately interwoven with its Framework that it cannot possibly be lifted from its context as though it were an inset hymn. The Song of Hannah was not inserted as an existing hymn into an extant account, but was clearly woven from the same fabric as the material surrounding it to express primarily Hannah’s elevated condition: her joy over the birth and the dedication of Samuel to YHWH’s service.

There are several unmistakable connections between the preceding narrative and the Song, e.g., the fact that Hannah is barren (1:6) and the mention of ‘the barren woman’ in 2:5; the fact that she went hungry (1:7) and the explicit reference to ‘the hungry’ in 2:5; the fact that she is tormented and humiliated by her rival Peninnah and unable to resist her (1:6) and the reference to her ‘gloating over her enemies’ in 2:1 and the reference to ‘the feeble’ in 2:4, and to YHWH’s ‘lifting the weak out of the dust’ in 2:8.

At the same time the Song strongly alludes to the central theme in the Book(s) of Samuel: the preparations to pave the way to designate a king as YHWH’s ‘anointed’. It is important to note that in the very first verseline Hannah expresses her joy over her own elevated condition, being the mother of Samuel (v. 1):

My heart exults in YHWH! My horn is raised by my God!

And in the last verselines she expresses the hope that YHWH will elevate his anointed and establish his kingship (v. 10):

May he endow his king with strength and raise the horn of his anointed!

The very last word, יְהֹוָה, ‘his anointed’ (v. 10e), is a powerful key-word unambiguously alluding to the enthronement of David (compare Ps. 132:17).

In addition, the other leading theme of the Song, the elevation of the meek and the weak (vs. 4-5), strongly alludes to the elevation of Samuel, Saul, and David, from humble circumstances to distinction and power, which constitutes the heart of the narrative in the Book(s) of Samuel. The Song subtly but clearly portends the events to come. This also holds true for the downfall of the house of Eli, seeing the allusion in 2:10 to the name Eli by means of the appellative יְהוֹנָה, ‘The High One’ – see the note below the chart.

This is a clear indication that - as the follow-up to the Song at the Reed Sea, the Song of Moses, and the Song of Deborah - the Song of Hannah is the fourth stepping-stone in the Deuteronomistic History towards the ultimate goal of the Exodus: the establishment of a settled nationhood for the people of Israel under a king chosen by YHWH. The fifth, and last, stepping-stone is the Song of David in 2 Samuel 22, celebrating the foundation of the Davidic kingdom. The Song of Hannah at the beginning of the Book(s) of Samuel, and the Song of David at the end, function as a compositional device for inclusion to illustrate the unity of the Book(s) of Samuel and the logical flow of thought. Note how both songs begin by using the metaphor of the raised horn, symbolizing elevation (compare 1 Sam. 2:1 and 2 Sam. 22:3), and how they end similarly by paralleling the terms “his king” and “his anointed” (cf. 1 Sam. 2:10 and 2 Sam. 22:51).

In fact, there are several conspicuous similarities between the Song of Hannah and this Song of David, which not only demonstrate their close relationship, but also suggest common authorship. Among them is the theme of YHWH’s incomparability (1 Sam. 2:2 and 2 Sam. 22:32 – compare also Exod. 15:10 and Deut. 32:39).
This important theme is another feature showing that the two Songs were specifically composed to suit their context in the Samuel narrative.

The fact that the Song was composed along with its framework, as I have argued, does of course not entail that Hannah composed the Song. Personages do not produce literature; they are part of it, and what they say or sing is placed on their lips by the author of the work in question. The real poet is to be found in the circle of the author(s) of the Deuteronomistic History, who produced his work in close cooperation with them. In my opinion, this poet may be the author of all five embedded hymns in the Deuteronomistic History: the five literary stepping-stones from the Exodus event to the establishment of the kingship of David: the Song at the Reed Sea, the Song of Moses, the Song of Deborah, the Song of Hannah, and the Song of David in 2 Samuel 22.

Special Features of 1 Samuel 2:1-10
- The Song of Hannah exhibits the typical characteristics of the numerical compositions we find in the Book of Psalms. The psalm has a distinct middle in terms of words and cola, v. 6a: "It is YHWH who puts to death and brings to life", which has clearly been designed as its meaningful centre on word- and colon level. The 3 middle words (113 = 55 + 3 + 55) coincide precisely with the middle colon, which is flanked by 17 cola on either side (35 = 17 + 1 + 17). The meaningful centre is extra focused on by the middle instance of the 9 occurrences of the name YHWH in v. 6a: 9 = 4 + 1 + 4. In addition to the meaningful centre on word- and colon level, as in many other psalms, the poem has a larger meaningful centre constituted by the middle strophe, vs. 6-7. See Observation 1.
- As in many psalms, syntax is used to weave extra divine name numbers into the text, achieving exactly 85 (5 x 17) words in the main clauses (Column c) and 28 in the subordinate clauses (Column d).
- Another feature the poem shares with other psalms is the use of the numerical value of a keyword to define the number of words in (part of) the text: the 58 words in vs. 6-10 represent the numerical value of the important keyword פֶּתֶרָה, 'his anointed' (v. 10e).

Strophic structure - Canto/Stanza boundary: ||
- Labuschagne: 1b-e, 2-3 || 4-5, 6-7, 8 || 9, 10 (3 cantos with 7 strophes in a menorah pattern, 16 verselines and 35 cola). I take v. 1b-e and v. 10 as distinct strophes on the basis of content and their function as a device for inclusion. See Observation 2.
- Fokkelman (NAPS IV, Assen 1993, pp. 73-111): 1b-2, 3 || 4-5, 6-7, 8 || 9-10a, 10b-e (3 stanzas with 7 strophes, 17 verselikes and 35 cola, taking vs. 8a-b, c-d, e-f, and 9a-b and 9c-10a as separate verselines).

Logotechnical analysis
- Columns a and b show the number of words before and after the atnach.
- Column c: words in the main clauses; d: words in the subordinate clauses.
- The verselines are numbered in the column to the right of the Hebrew text.

The MT reading יִהְיֶה מַכְלָה in v. 10a should be corrected to read יִהְיֶה מַכְלָה, 'his adversaries'. The word יָשָׁר in 10b, however, is more problematic. It could either be read יָשָׁר, 'upon him', or יָשָׁר, 'Most High', but still better, in my opinion, יָשָׁר, 'The High One'. Verse 10b then reads יָשָׁר, יִהְיֶה מַכְלָה יָשָׁר, "The High One will thunder from the heavens". The word יָשָׁר as such is not attested in MT, but it does occur in יָשָׁר, יִהְיֶה מַכְלָה יָשָׁר, 'the higher pools', (Jos. 15:19 and Judg. 1:15 – HALOT, p. 832). Seeing the parallelism in 10a-10b, the appellation יָשָׁר, 'High One', is evidently a designation of YHWH, a synonym of יָשָׁר, יִהְיֶה מַכְלָה, which was deliberately chosen in the Song of Hannah to allude to the priest אֵל (אֵל). See my Short Note, "The Divine Title יָשָׁר, 'The High One', in the Song of Hannah", VT 58 (2008), pp. 644-649.

Observations

1. In terms of the 113 words of the poem the arithmetic centre is constituted by the 3 words of v. 6a (113 = 55 + 3 + 55):

   יִהְיֶה מַכְלָה יִהְיֶה מַכְלָה יִהְיֶה מַכְלָה

   It is YHWH who puts to death and brings to life.

   The pivotal positioning of these words is buttressed by the fact that they constitute the middle colon of the poem, significantly flanked by 17 cola on either side (35 = 17 + 1 + 17). Moreover, the central position of v. 6a is additionally focused on by the middle instance of the 9 occurrences of the name יִהְיֶה in v. 6a: 9 = 4 + 1 + 4 (marked in the table above).

   These three words are part of the middle strophe, vs. 6-7, the larger meaningful centre, which expresses more fully YHWH's control of human affairs (7 = 3 + 1 + 3). It falls within the middle canto, Canto II, vs. 4-8, of which the leading theme is lowliness and elevation. The pivotal strophe reads as follows:

   יִהְיֶה מַכְלָherent יִהְיֶה מַכְלָherent יִהְיֶה מַכְלָherent

   It is YHWH who puts to death and brings to life,

   He brings down to Sheol and he brings up.

   יִהְיֶה מַכְלָherent יִהְיֶה מַכְלָherent יִהְיֶה מַכְלָherent

   It is YHWH who makes poor and makes rich,

   He brings low and he elevates.

   The meaningful centres express the conviction that YHWH is the God who acts in history and holds the destinies of individuals and nations in his hand. On the one
hand, it refers to Hannah’s destiny to overcome her low condition and be elevated to her high position as the mother of Samuel. On the other hand, it alludes to the elevation of the people of Israel from bondage to nationhood, and to the elevation of Samuel, Saul, and David, the leading theme in the Book(s) of Samuel. Moreover, the meaningful centre refers to God’s judgement over the house of Eli.

2. The 7 strophes can be outlined in a symmetric menorah pattern:
- Strophe 1, v. 1b-e Hannah exults in YHWH and rejoices in her elevation
- Strophe 2, vs. 2-3 The incomparable God governs human affairs
- Strophe 3, vs. 4-5 Elevation of the meek and the hungry
- Strophe 4, vs. 6-7 It is YHWH who controls the state of human beings
- Strophe 5, v. 8 Elevation of the weak and the poor
- Strophe 6, v. 9 YHWH guards the footsteps of his loyal servants
- Strophe 7, v. 10 He punishes his enemies and elevates his anointed.

Note how the key-word ‘horn’, symbolizing elevation, in Strophes 1 and 7 function as a device for inclusion.

3. I have already presented an overview of the impressive list of the significant structural numbers in the framework to the Song. Here are those occurring in the Song, of which some may be due to coincidence:
   - v. 1b-e 13 words, the numerical value of ‘èchad, ‘one’ (1 + 8 + 4 = 13)
   - vs. 1b-2 13 words in the main clauses (Column c)
   - vs. 1b-3 17 words after atnach
   - vs. 3-5 17 words after atnach
   - vs. 3-5 33 words, with 26 in the main clauses (Column c)
   - vs. 1b-5 55 words, constituting the YHWH ‘èchad formula (26 + 13 = 39) in the main clauses (Column c), which buttresses the idea of YHWH’s incomparability and uniqueness in v. 2
   - vs. 1b-7 34 (2 x 17) words before atnach, with 51 (3 x 17) in Column c
   - vs. 4-8 26 words before atnach
   - vs. 3-8 34 (2 x 17) words before atnach
   - vs. 1b-9 52 (2 x 26) words before atnach
   - vs. 9-10 27 words (the numerical value of Hannah: 8 + 14 + 5 = 27)
   - vs. 6-10 34 (2 x 17) words before atnach
   - vs. 4-10 34 (2 x 17) words after atnach
   - vs. 1b-10 51 (2 x 26) words after atnach
   - vs. 1b-10 85 (5 x 17) words in the main clauses (Column c).

As in many psalms (e.g., 5, 6, 14, 30, 31, 33, 38, etc.), syntax has been used to create divine name numbers in terms of the differentiation between main clauses and subordinate clauses, here introduced by the conjunction ki, ‘for/because’.

4. The name נָבִיָּה occurs 9 times in the Song, with the middle instance falling precisely in the arithmetic middle of the poem, v. 6a, where it highlights the meaningful centre. These 9 occurrences, together with the 21 occurrences in 1:1-28, and the 1 instance in the concluding narrative (v. 11), give 31 occurrences altogether in the entire story of Samuel’s nativity. It is difficult to tell whether there is any relationship between the 31 occurrences of the divine name and the 31 words used to relate the birth of Samuel in vs. 19-20. This may be the case, seeing the conspicuous accumulation of occurrences especially at the end of chapter 1 (no less than 9x in vs. 21-28, against 12x in vs. 1-20), which may point to deliberate design.
