**The role of impaired *de novo* Coenzyme A biosynthesis
in Pantothenate-Kinase Associated Neurodegeneration:**

Insight from a Drosophila model

Anil Rana

The research described in this thesis was conducted at the Department of Cell Biology, Section Radiation and Stress Cell Biology, University Medical Center Groningen, The Netherlands. The printing of this thesis was financially supported by: University of Groningen, Groningen University Institute for Drug Exploration, Genetic Services, USA & Department of Radiation and Stress Cell Biology.

TABLE OF CONTENTS

ABBREVIATIONS		7
CHAPTER 1	Introduction and aim of the thesis	9-32
CHAPTER 2	<i>De novo</i> CoA biosynthesis is required to maintain DNA integrity during development of the <i>Drosophila</i> nervous system	33-60
CHAPTER 3	Pantethine rescues a <i>Drosophila</i> model for pantothenate kinase-associated neurodegeneration	61-84
CHAPTER 4	Effects of various doses of pantethine in healthy mice	85-94
CHAPTER 5	<i>Drosophila</i> phosphopantothenoylcysteine synthetase is required for tissue morphogenesis during oogenesis	95-116
CHAPTER 6	Summarizing discussion	117-126
APPENDICES	Nederlandse samenvatting	128-130
	Acknowledgements	131-133
	CV	134
	List of publications	135
