ACKNOWLEDGEMENTS

Time just flies away! If I look back in time and ponder, I realize that I have spent nice time during my PhD and this could not have been possible without many people around me. I am grateful towards all those and would sincerely like to thank them.

First and foremost, I offer my sincerest gratitude to my supervisor Prof. Dr. **Ody Sibon**. Ody, your motivation and support was instrumental towards completion of this thesis. I really appreciate your interest & optimistic attitude towards science and research. I respect your caring attitude towards the students.
