The work described in this thesis was performed within the Groningen Expert Center for Kids with Obesity of the University Medical Center Groningen. This work was financially supported by Hutchison Whampoa Ltd. and by the University Medical Center Groningen. This research is part of the TRacking Adolescents' Individual Lives Survey (TRAILS). Participating centers of TRAILS include various departments of the University Medical Center and University of Groningen, the Erasmus University Medical Center Rotterdam, the University of Utrecht, the Radboud Medical Center Nijmegen, and the Parnassia Bavo group, all in the Netherlands. TRAILS has been financially supported by various grants from the Netherlands Organization for Scientific Research NWO (Medical Research Council program grant GB-MW 940-38-011; ZonMW Brainpower grant 100-001-004; ZonMw Risk Behavior and Dependence grants 60-60600-98-018 and 60-60600-97-118; ZonMw Culture and Health grant 261-98-710; Social Sciences Council medium-sized investment grants GB-MaGW 480-01-006 and GB-MaGW 480-07-001; Social Sciences Council project grants GB-MaGW 457-03-018, GB-MaGW 452-04-314, and GB-MaGW 452-06-004; NWO large-sized investment grant 175.010.2003.005); the Sophia Foundation for Medical Research (projects 301 and 393), the Dutch Ministry of Justice (WODC), the European Science Foundation (EuroSTRESS project FP-006), and the participating universities.

Financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged.

The printing of this thesis was financially supported by the Graduate School of Medical Sciences of the University Medical Center Groningen, the University of Groningen, SANYO Biomedical Europe BV, Eli Lilly Nederland BV, Pfizer BV, Nutricia Nederland BV.

Ode aan de dataverzameling

Om zeven uur 's ochtends
Is de lucht boven Leeuwarden
Eindeloos mooi

Onderaan, onderweg
Kijk ik vol verwondering toe

Boven mij, boven de wolken
Lijkt de lucht maar de lucht
Zo ontzettend zonde

Paranimfen:

Ylian Liem

Laura van Loon

CONTENTS

	List of abbreviations	8
	Manuscripts on which this thesis is based	11
Chapter 1	General Introduction	13
Part 1	Risk Factors for Development of Overweight in Adolescence	
Chapter 2	Genetic Factors	
2.1	Influence of common variants near <i>INSIG2</i> , in <i>FTO</i> , and near <i>MC4R</i> genes on overweight and metabolic profile in adolescence	29
2.2	Influence of <i>DRD2</i> and <i>SLC6A4</i> genes on impulsivity and adiposity in adolescence	51
Chapter 3	Growth and Development	
	Periods of infancy and childhood growth affecting adiposity at age 16 years	65
Chapter 4	Depressive Symptoms	
4.1	Review of the literature on the association between depressive symptoms in childhood and adolescence and overweight in later life	85
4.2	Associations between depressive symptoms in childhood and overweight and its metabolic complications in adolescence	105
Part 2	Body Composition in Prepubertal Children	
Chapter 5	Body Composition	
5.1	Comparison of methods to assess body fat in nonobese six- to seven-year-old children	119
5.2	Measuring abdominal adiposity in six- to seven-year-old children	135
Chapter 6	Summary & General Discussion	151
	Samenvatting	175
	Dankwoord	181
	About the author	185
	Previously published PhD theses on TRAILS data	186
