## **Acknowledgement**

First and foremost, I would like to thank Prof. Andreas Herrmann for his infinite support, patience and trust on me in the greatest possible terms. Being a Ph.D. student under your supervision was indeed a huge turning point for my scientific education and career. Remembering our suffered period, especially during the move to and settlement in Groningen, I will never forget our bitter but fruitful time not only at work also in relationships. Andreas, as you said, person who put efforts will eventually succeed.

Very special thanks go to Prof. Klaus Müllen for giving me an opportunity to start my Ph.D. training under his group in Mainz. His continuous supports, even after my leaving, should also be acknowledged. It is a great honor for me to be a part of your research achievements and personal care.

A few colleagues of mine deserve special mention. Deepak has been always my best working and chatting partner in Germany and Netherlands, and I hope he still will be. In Germany, Fikri transferred his enormous knowledges to me and I appreciate discussions with him and hospitality from his family. Special thanks to an excellent chef and writer, Andrew for his work and cuisines. Milena and Meryem also deserve thank words for their help.

I would like to thank all reading committee members, Prof. Gerrit ten Brinke, Prof. Katja Loos and Prof. Maria Loi, for reading my thesis and their valuable comments. Their supports in the Zernike Institute should be also acknowledged.

Thanks to a number of people in the institute, the group members of PCBE (Jur, Agnieszka, Jan Willem, Tobias, Jan, Alberto, Anke, Andreas Bastian, Diego, Alessio, Alina, Jeewon, Lifei and newcomers), polymer chemistry people (Prof. Arend Jan Schouten, Karin, Yvonne, Joop, Ralph, Vladmir, Ivana, Martin, Jakob, Frans, Wendy, Wouter, Jeroen, Leendert, Thu, Jie, Fei, Winnie, Rachma, Lia, Eryth and Lieuwe Jan) and people in Nijenborgh 4 (Armagan, Wesley, Alex, Ilias, Niko, Marc and supporting crews). I am grateful to my best and most collaborator, Jia, for all works and discussions we made together.

I would like to thank to many collaborators (Prof. Cornellissen, Prof. Nolte, Inge, Melanie, Rüdiger, Rabea and Jie), Prof. Kwang-Yol Kay and to my friends (Changduk Yang, Kyoungtaek Kim, Yongjae Yoo, Wojtek, Choongyol and Daejune) in other cities.

It is time to mention my family now. Very special thanks to Sunghye, my wife, for everything. We have been through all things and we together will. To my family, I can not express my gratitude in words to my parents and to my mother-in-law in Korea. Finally, I would like to send my special thanks to people resting in peace, especially my grandparents, who gave me great love. Finally, best wishes for all of you reading this words whether listed above or not!
