致谢

It can be tough to live abroad doing a PhD for 4 years, as I still remember people seriously concerned whether I would come back to Groningen after my first vocation back to China. As you see, I did, and the fact is that I cannot have any better way to spend the passed four years, which is so pleasant and fruitful. There were some difficult moments, but none of them has become a real problem, which is because of your understanding, help, concerns, patience and excuse. Herewith, I would like to express my sincere gratitude to everybody in my 4-year PhD life in Groningen.

I would like to thank my promoter, Prof.dr. C.G.M. Kallenberg. Dear Cees, I feel so lucky to have been one of your students. Thank you for guiding me through the 4 years of research. Thank you for giving me all possible opportunities to exercise and improve myself. Thank you for always being concerning with my future career. Among many to be mentioned, your rigorous attitude in both research and writing is unforgettable. Thank you, Dienneke, for those nice photos and the beautiful flower you sent to me, which has been blossoming for a year.

Thanks for my co-promoter, daily coach, Dr. J. Westra. Dear Hannie, I enjoyed all the discussions we had, about work and about life. Your advices, encouragement and understanding made me confident and “survive” till today. Thank you for being my first aid, consultant, introducer, consoler and also stimulator who accompanied me through those ups and downs in the last four year!

My sincere thanks go to the reading committee members, Prof. dr. J.W. Cohen Tervaert, Prof. dr. M.R. Daha and Prof. dr. E. Vellenga. Thank you for your consideration and efficient assessment of my thesis.

Thanks to everybody in our ANCA group. Dear Piet, thank you very much for all the helpful suggestions on my work, and for the considerate and sweet birthday card. Dear Peter, thank you for those inspiring discussions. Dear Wayel, I know it is true from you that “Want to know the way ahead? Ask the people came back.” Dear Henko, it was so nice and comfortable to be working together with you in the last four years. Dear Minke, you succeeded to make me feel at home. How can I forget the Chinese dinner, the car travelling around half Holland and your countless offers “I want to help you, if you like!” I should just say thank you for everything! Thanks for our fresh blood, Nikola and Birgit. I wish both of you a lot of success in your research!

I enjoyed every moment in the lab. Johan, Gerda and Berber, thank you for the precise technical support. Dear Johan, thank you for those warm greetings and always confirming that I was positively doing experiments, not torturing myself, before you went home. Take good care of yourself! Dear Berber, thank you for letting me know that try to enjoy is also a way to reduce suffering during pregnancy and for supervising me on the project of being a mother. Dear Jetske, the education you gave me on “handif” was great! Dear Rita, it was so interesting to hear your description of those things I cannot be more familiar with! For the first time, I realized that watermelon could not be served as desert. Do be my guest, when next time you come to Beijing!

My thanks also go to all my blood donors in the lab of Immunology and Transplantation. Here, I omitted a long list of names that is kept in my heart and of course in the database. For some of my special donors, dear Marcel, Wineke, Niels and Richard, I highly appreciated your contribution and trust to my research! Maybe, sometimes, it is not so good to be special. ☺ Dear Joan and, again, Niels, thank you for thousands of times assisting me to puncture my victims.

I would like to thank the clinicians, Dr. M. Bijl, Dr. E. Brouwer, Dr. A. Rutgers and Dr. C.A. Stegeman, who helped me to collect patient samples and summarize piles of clinical information.

Many thanks to the (ex)PhD students from Medical Biology, Betty, Neng, Gopi and Kassia, for sharing technical and also joyful experiences with me. Thank you, Bart-Jan, for all those instrumental suggestions and intriguing hypotheses. I also appreciate support and supervision from Henk and Jelleke on the cell culture. I did not count in the agenda, but I must have spent at least hundreds of hours in the FACS center. Many thanks to Geert, Henk and Roelof-Jan, for technical support, and I enjoyed those cozy afternoons with you when sorting cells.

Thanks to my roommates in U3.153, Hans, Karina, Sebastian, Deena, Niels, Paulina and Suzanne. Although the window is small, our talks and jokes made me feel sunny and warm. Thank you all for bringing me an easy, pleasant and stimulating atmosphere.

Thanks to our secretaries, Kiki and Janny, for helping me with Dutch documents and all those official procedures from MVV application to the defense ceremony, which would, otherwise, have driven me crazy!

Special thanks to my Chinese friends in Groningen, Hongyou, Qingsong, Xing Quan, Marcy, Lili, Qian Cheng, Han Lina, Zhao Yan, Meimei, Zhao Bo, Xiaoyan and Duan Li. It might sound not logical, but I have to say that China is large, while the world is small! That is why we met here. We have been so far from home, but never lonely. Wish you all the best whatever you do and wherever you are!

My sincere appreciation goes to Prof. dr. M.H. Zhao. Dear Ming-Hui, thank you for leading me to the world of scientific research and recommending me to Groningen where I had such a wonderful experience. Your support and understanding made everything here possible and made me confident to move on.

亲爱的爸爸，妈妈，感谢你们多年来不计代价的支持和鼓励；感谢你们给我自由和信任；感谢你们的爱和理解！我还想说的是对不起，多少个春节和中秋不能回家团聚；在你们需要我的时候不能帮忙，甚至不能陪在你们身边；更重要的是，是我的成长消磨了你们的青春…… Dear Mam and Dad, for so many years, you have never hesitated to support and encourage me, regardless how much effort you had to pay for it. Thank you for giving me freedom and trust. Thank you for your love and understanding. I also want to apologize for letting you alone when others were having family parties, for being away when you needed my company and help, and I am sorry my grown-up finally made you grandma and grandpa. ☺ Sun Di and Yaochen, I am so lucky to have you in my life!

With love,

Nan Hu
