About the author

Martina Krokavcova was born on October 22, 1975, in Hnusta, Slovak Republic. After completing secondary school in Rimavska Sobota she studied psychology at the Department of Psychology, University of PJ Safarik, Kosice. Her Master's dissertation "Psychological well-being among cancer patients and patients after heart attack" dealt with mental health status in two most occurring chronic diseases. In the years 1999-2001 she worked for the high school in Tisovec as a school psychologist and teacher. She delivered lectures on psychology, prepared Slovak students for attending US high schools and was involved in diagnostics and psychological counselling. In the following two years she was a psychologist for the Pedagogical, Psychological and Consulting Centre in Kosice. She cooperated with teachers and parents of students with mental problems. In 2003 she started her work at the University of PJ Safarik as a researcher while also starting her PhD studies at University of Groningen, The Netherlands. In addition, she delivered lectures on developmental psychology for students of nursing at the Faculty of Medicine, at social-psychological training sessions, supervised students' bachelor degree dissertations and participated in an international research project. During this time she finished training in relaxation-imaginative psychotherapy. At present she is working at the 1st Department of Psychiatry, Faculty of Medicine, University of PJ Safarik as a university teacher, and for the University Hospital as a clinical psychologist. Her professional interests focus on research on the psycho-social determinants of health behaviour in patients with multiple sclerosis and mental disorders, social-psychological training and improving communication skills in medicine.
