## **Acknowledgements**

First and foremost I praise and acknowledge Allah, the most beneficent and the most merciful. Secondly, my humblest gratitude to the Holy Prophet Muhammad (Peace be upon him) whose way of life has been a continuous guidance for me. This thesis appears in its current form due to the assistance and guidance of several people. It gives me great pleasure to express my gratitude to all those who supported me and have contributed in making this thesis possible.

I express my profound sense of reverence to my promotor Prof. dr. J. Hille who gave me the opportunity to work in the department of Molecular Biology of Plants. His continuous support, motivation and untiring guidance have made this dream come true. His vast knowledge, calm nature and positive criticism motivated me to strive for nice results. Thanks to him for bearing my mistakes and whenever I couldn't meet the deadlines. I am also grateful to my co-promotor Dr. Frank C. Lanfermeijer for his critical but valuable suggestions for my thesis.

I would like to thank the esteemed members of the reading committee Prof. dr. J.T.M. Elzenga, Prof. dr. J. Kok and Prof. dr. L. Dijkhuizen for their important remarks about my thesis. Moreover, thanks are due to Prof. dr. J.T M. Elzenga for accommodating me as guest researcher in his group and providing green house and climate room facilities in the last year of my PhD.

It is enjoyable and exciting to have lab fellows like Sujeeth, Eelco, Kamran and Jan. Special thanks to Sujeeth and Eelco who helped me a lot to get started with the molecular work in the lab. Especially Eelco's availability for the translations of Dutch documents has been remarkable. It was nice to exchange ideas and chat in our indigenous language with Sujeeth and Kamran at coffee and lunch breaks. It was also nice to work in the lab with Jan and to share good jokes. I also had a pleasant time with my office mate Oktavia and she helped me in some official matters too. It was great fun with my lab fellows on tours and parties.

I would also like to thank my other colleagues Aukje, Margriet, Bert, Reza, Jos and Marcel. They helped me in one way or another when I joined the group but unfortunately later on they moved to other positions. At this moment I must acknowledge the cooperation of all my colleagues from the department of Plant

Physiology. Special thanks are due to Ger and Jacob because both have been very helpful in solving problems related to climate rooms and green houses.

Being abroad and in a completely different culture was a new experience for me but it turned out well due to my Pakistani friends here. It was nice to have get-togethers and occasional celebrations with Rashid, Zia, Younas, Shahbaz, Ehsan, Bilal, Ali, Munir, Ghufrana and Imran. Special thanks are due to Younas, Zia, Ehsan, Kamran, Imran, Sujeeth and their wives for offering delicious meals during lunches on Fridays and occasionally at dinners. Most especially thanks to Rashid and Zia for nice company and boosting my morale especially in the end phase of my thesis writing. I am pleased to acknowledge the best wishes of my honorable teacher Prof. dr. A. S. Khan, my Indian friends Diana and Pramod and other Pakistani friends in Groningen like Sulman, Afzal Soomro, Omar Zaigum, Omar, Afzal, Irfan, Javed, Shafiq, Tariq, Aisha, Nazia, Nadia, Ishtiaq, Tanveer, Waqas, Mansoor, Arslan, Adnan, Latif and Ata.

I acknowledge the Higher Education Commission (HEC) of Pakistan and the Netherlands Organization for International Cooperation in higher education (NUFFIC) for financing and giving me the opportunity to achieve my PhD degree from the University of Groningen.

Last but not least I would like to acknowledge my parents, brothers and sisters for their constant support, prayers and best wishes. They uplifted my morale whenever I needed. In fact to get a PhD from a well-recognized institute abroad was a wish of my father, Ghulam Rasul, which I am going to fulfill, in-sha-Allah. This moment also reminds me of the affection of my Uncle, Ghulam Nabi (Late) who has been the first inspiration for me in getting higher education. May his soul rest in peace. I also want to appreciate my brother-in-law, other Uncles and Aunts whose prayers were always with me. Finally I would say thanks to all who have been supportive and well-wishers to me in this period of life.

***Jjaz Rasul***
