## Contents

<b>1. Introduction</b>	
1.1 General introduction	10
1.2 Objectives and main research questions of this thesis	11
1.3 Terms and definitions	15
1.4 Estimates of clinically relevant change	21
<b>2. Effect of intrathecal baclofen delivered by an implanted programmable pump on health related quality of life in patients with severe spasticity</b>	
2.1 Introduction	36
2.2 Methods	36
2.3 Results	40
2.4 Discussion	46
2.5 Conclusion	47
<b>3. Psychometric properties of the Minnesota Living with Heart Failure - Questionnaire (MLHF-Q).</b>	
3.1 Introduction	53
3.2 Methods	54
3.3 Results	57
3.4 Discussion	66
<b>4. How to interpret the magnitude of change in health-related quality of life? A study on the use of Cohen's thresholds for effect size estimates.</b>	
4.1 Introduction	73
4.2 Materials and methods	76
4.3 Results	89
4.4 Discussion	84
<b>5. How to validate clinically important change in health-related functional status. Is the magnitude of the effect size consistently related to magnitude of change as indicated by a global question rating?</b>	
5.1 Introduction	95
5.2 Patients and methods	98
5.3 Determination of concordance between two intervals of magnitude of change	100
5.4 Results	103
5.5 Analysis	106
5.6 Discussion	113

**6. Why don't we ask patients with coronary artery disease directly how much they have changed after treatment?**

Comparison of retrospective multi-item change scales with serial change in domains A of health related functional status.

6.1	Introduction	121
6.2	Methods	123
6.3	Results	127
6.4	Discussion	138

**7. Conclusions and discussion**

7.1	Introduction	144
7.2	Main results and consequences for methodology of assessing change in HRFS	144
7.3	Recommendations for practice and research	152

**8. Summary** 157

**9. Samenvatting** 164
