Functional Magnetic Resonance Imaging of Tinnitus

Proefschrift

ter verkrijging van het doctoraat in de
 Medische Wetenschappen
 aan de Rijksuniversiteit Groningen
 op gezag van de
 Rector Magnificus, dr. F. Zwarts,
 in het openbaar te verdedigen op
 woensdag 31 maart 2010
 om 16.15 uur

door

Cornelis Pieter Lanting

geboren op 22 december 1980
 te Bedum

Promotor: Prof. dr. P. van Dijk

Copromotor: Dr. ir. E. de Kleine

Beoordelingscommissie: Prof. dr. J. Eggermont
Prof. dr. G.J. ter Horst
Prof. dr. J.B.T.M. Roerdink

“The beginning of knowledge is the discovery of something we do not understand.”

— Frank Herbert (1920–1986)

“Education is what survives when what has been learned has been forgotten.”

— B. S. Skinner (1904–1990)

Publication of this dissertation was financially supported by:

Nationale Hoorstichting / Sponsor Bingo Loterij.
Stichting Atze Spoor Fonds
University of Groningen
School of Behavioral and Cognitive Neuroscience (BCN)

Atos Medical BV
Biomet Nederland BV
EmiD audiologische apparatuur
Oticon Nederland BV
Veenhuis Medical Audio BV

The research presented in this thesis has been carried out in the Graduate School of Behavioral and Cognitive Neurosciences (BCN).

The cover shows a word-cloud, in which the frequency of the words in this thesis are represented by their size (see e.g. wordle.net).

Contents

Contents	vii
1 Introduction	1
1.1 Outline of this thesis	2
1.2 From sound to neural signals	5
1.3 Tinnitus	15
1.4 Functional magnetic resonance imaging	18
2 Neural activity underlying tinnitus generation: Results from PET and fMRI	25
2.1 Introduction	27
2.2 Functional imaging methods	29
2.3 Neuroimaging and tinnitus	32
2.4 Discussion	44
2.5 Conclusion	51
3 Functional imaging of unilateral tinnitus using fMRI	53
3.1 Introduction	55
3.2 Materials and Methods	56
3.3 Results	59
3.4 Discussion	61
3.5 Acknowledgements	63
4 Unilateral tinnitus: changes in lateralization and connectivity measured with fMRI	65
4.1 Introduction	66
4.2 Materials and methods	67
4.3 Results	70
4.4 Discussion	80
4.5 Conclusion	85
5 Neural correlates of human somatosensory integration in tinnitus	87
5.1 Introduction	88
5.2 Materials and methods	90
5.3 Results	95
5.4 Discussion	105

5.5	Conclusion	108
6	A diffusion tensor imaging study on the auditory system and tinnitus	109
6.1	Introduction	110
6.2	Materials	113
6.3	Methods	114
6.4	Results	118
6.5	Discussion	122
6.6	Acknowledgements	124
7	General conclusions	125
7.1	Introduction	126
7.2	Experimental paradigms on functional imaging methods of subjective tinnitus	126
7.3	Increased sound evoked responses in subjects with unilateral tinnitus	127
7.4	Changes in lateralization and connectivity patterns in subjects with unilateral tinnitus	128
7.5	Neural correlates of somatosensory modulation of tinnitus	130
7.6	The auditory pathway – is the limbic system involved?	131
7.7	Conclusions and outlook	132
	References	135
	Summary	151
	Samenvatting	157
	Nawoord	163
	Curriculum Vitae	167
