## Acknowledgments

This thesis came into existence with four years of work in the *Micromechanics of Materials* group and marks the end of Groningen era in my life which I enjoyed with the company of several colleagues and friends. Therefore in this last section I would like to thank to those who have helped me and created many good memories during these years.

I am mostly grateful to my supervisor Prof. Dr. Erik van der Giessen for his guidance and scientific insight as well as for showing me the way to get the most fun out of science. Erik, your constant encouragement, confidence in me and willingness to provide me the freedom to steer the project helped me immensely in the pursuit of becoming an independent researcher. Thank you for your extremely friendly attitude and openness too.

I am also grateful to the members of the Reading Committee, Prof. Dr. Huajian Gao, Prof. Dr. Marc Geers and Prof. Dr. Oliver Kraft, for their assessment and valuable comments on my thesis.

The financial support from the European Commission (6<sup>th</sup> Framework) through the STREP project NANOMESO is gratefully acknowledged.

The fellow  $\mu\text{Me}\chi$  members, Goran, Liesbeth, Sietze, Jorn, Peter, Ratna, Kodanda, Ranjeet, Ashok, Siamak, Subhradeep, Andreas, Teun, Monica, Yor, Radu, Doğan, Syed, Sandeep, Siva, Ali, Xioming, Kapil, Ria and Patrick, thank you all for your friendship, stimulating scientific discussions as well as equally stimulating chats about anything during lunch breaks, help on linux issues, tips about coping with the bureaucracy and for lifting the language barrier. I enjoyed a lot during the Nerds' Dinners, Christmas Dinners, and group activities. Thank you Monica for the thesis template. Cihan, thank you for the warm-up lap in the group and around Poelestraat. I had wonderful times during long cooking sessions and much shorter eating hours, all the fun we had through reading our lives as a fiction and political discussions. Now, I am also glad to know that whenever a deadline is over you will be around the corner.

Nadir, you were the first person whom I met in Groningen and I consider myself lucky even for that reason along many others. You were there for me whenever I need a hand. We shared countless hours chatting about work, peculiarities we have faced, remoteness of the beloved and even about the number patterns in a roulette wheel.

Kanat, friendship is your nature. Our stand almost always resonated. I cherished every moment that we have spent together. Berfu, Piray, Leonardo, Ebru, Sanem, Onur, Eda, Umut, Aksel, Eda, Umut, Burcu, Ozan, Devrim, Araz, Orçun, Zafer, Devrim, Hande, İdil, Hülya, Aslı and Burcu thank you for all the wonderful times and of course for the best gift ever made!

We all started at exactly the same point in 2006 with Cem, Seçkin and Ahmet yet scattered into the different spots in the Netherlands. Your friendship has always been priceless to me. Cem, your continuous support especially during the lonely last couple of months in the office meant a lot to me. Your sense of humour is a life saver. Ahmet, you are perpetually astonishing me with your endless curiosity on almost everything but seeing your strength during and after the troubled times has been truly inspiring.

My mother Bilge Ayas and my sister Ceren Ayas constantly supported me by sharing my mood, feelings, and even the tiny details of my life through phone. It was an unforgettable week of happiness when you came over while rambling on the streets of Groningen, admiring paintings of Van Gogh in Amsterdam and having family laughter in our living room in Gent.

Finally my last words comes for my dearest Özlem. You were the one who persuaded me to get what I really wanted in the middle of the toughest times. You hopped on a plane only two months later. We held hands and experienced new horizons. We have beaten the distances with you, my ever lasting inspiration.

Can Ayas
