The studies presented in this thesis were performed at:

The Medical Research Council Epidemiology Unit Clinical Research Facilities: Princess of Wales Hospital, Ely, UK; the North Cambridgeshire Hospital, Wisbech, UK; or the Institute of Metabolic Science, Cambridge, UK.

The Wolfson Brain Imaging Centre, Addenbrooke's Hospital, Cambridge, UK

The Addenbrooke's Wellcome Trust Clinical Research Facility, Cambridge, UK.

The Robert Steiner MR Unit, Hammersmith Hospital, London, UK.

The Groningen Expert Center for Kids with Obesity of the University Medical Centre Groningen, the Netherlands.

The Chris Hani-Baragwanath Hospital, Soweto, South Africa.

This work was financially supported by the Medical Research Council (MRC) UK, University Medical Center Groningen, the Hutchison Whampoa Ltd., the Medical Research Councils of South Africa, the Wellcome Trust, the Cambridge University Hospitals NHS Trust NIHR Biomedical Research centre, the World Cancer Research Fund International, the European Union (EU Framework V), and the Mothercare Group Foundation.

The printing of this thesis was financially supported by the Graduate School of Medical Sciences of the University Medical Center Groningen and the University of Groningen.

RIJKSUNIVERSITEIT GRONINGEN

The Epidemiology of abdominal adiposity:

Validation and application of ultrasonography to estimate visceral and subcutaneous abdominal fat and to identify their early life determinants

Proefschrift

ter verkrijging van het doctoraat in de
Medische Wetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. E. Sterken,
in het openbaar te verdedigen op
maandag 30 januari 2012
om 14:30 uur

door

Emanuella De Lucia Rolfe

geboren op 25 februari 1975
te Stoke – on – Trent, UK

Promotor: Prof. dr. R.P.Stolk

Copromotor: Dr. K.K. Ong

Beoordelingscommissie: Prof. dr. P.J.J. Sauer

Prof. dr. M. Oudkerk

Prof. dr. M.L. Bots

Paranimfen:

Chris Rolfe

Dr Katrien Wijndaele

Contents:

Chapter 1: General introduction and objectives	9
--	---

Part 1: Validity of ultrasonography to determine abdominal fat compartments

Chapter 2: Ultrasound measurements of visceral and subcutaneous abdominal thickness to predict abdominal adiposity among older men and women	21
Chapter 3: Validation of ultrasound estimates of visceral fat in black South African adolescents	39
Chapter 4: Measuring abdominal adiposity in 6 to 7-year-old children	57
Chapter 6: Ultrasound for visceral and subcutaneous abdominal fat in infancy	89

Part 2: Early life determinants of abdominal fat

Chapter 5: Association between birth weight and visceral fat in adults	73
Chapter 6: Ultrasound for visceral and subcutaneous abdominal fat in infancy	89
Chapter 7: General discussion	109
