## **About the Author**

Emanuella De Lucia Rolfe was born on February 25<sup>th</sup> 1975 in Stoke-on-Trent, UK. She lived in Rome, Italy, until she completed High School in 1994 (Maturita' Linguistica) and then moved back to the UK. Emanuella has a degree in Food Science and Nutrition and an MSc in Public Health Nutrition. During her first degree she had the opportunity to spend her placement year with the EPIC study (European Prospective Investigation of Cancer and nutrition) in Cambridge, UK. After her MSc, she worked for the NGO HelpAge International in Ethiopia, where she assessed the nutritional status of adults in four different Ethiopian ethnic groups. In 2001, for a short period of time, she worked as a nutritionist for Danone UK, offering nutritional advice and answering questions posed by the public on the possible health benefits associated with Calcium. She joined the MRC Epidemiology unit in Cambridge, UK (the former Diabetes Research Group, Department of Public Health and Primary Care, Cambridge University, Cambridge, UK) in August 2001, where she is mainly responsible for the anthropometric and body composition activities of the unit. In November 2005 she started a part-time PhD in the Department of Epidemiology (University Medical Center Groningen, the Netherlands) under the supervision of Professor Ronald Stolk and Dr Ken Ong (MRC Epidemiology Unit, Cambridge, UK), while working as the Anthropometry Specialist in the MRC Epidemiology Unit.
