Contents

Chapter 1:	Introduction and outline of the thesis	9
-------------------	--	---

Part I. Different aspects in the development of biliary atresia in an animal model

Chapter 2:	The rota-virus induced murine biliary atresia model: current concepts	19
-------------------	---	----

Chapter 3:	Early development of liver fibrosis in biliary atresia: occurrence of epithelial to mesenchymal transition and hedgehog signal transduction <i>In preparation</i>	35
-------------------	--	----

Chapter 4:	Inflammation mediated down-regulation of hepatobiliary transporters contributes to intrahepatic cholestasis and liver damage in murine biliary atresia <i>Pediatric Research, in press</i>	53
-------------------	---	----

Part II. Clinical aspects of human biliary atresia and other pediatric liver diseases

Chapter 5:	Partial external biliary diversion for progressive familial intrahepatic cholestasis/ Alagille's disease <i>Journal of Pediatric Gastroenterology and Nutrition, in press</i>	77
-------------------	--	----

Chapter 6:	Steroids after Kasai portoenterostomy for biliary atresia: a systematic review and meta-analysis <i>Submitted</i>	91
-------------------	--	----

Chapter 7: Macroscopically visible biliary discharge during Kasai: a prognostic factor? 107
Submitted

Chapter 8: Summary, discussion and future perspective 117
