Acknowledgements

On the first interview with my supervisors they asked me: “Are you strong enough to cope with failures?” And I answered without humility: “Of course!” This was the start of my failures, which not caused my collapse, but, surprisingly, make me stronger then ever.

Firstly, I would like to thank all brave people, who are standing behind this international cooperation – only they know, how hard were all fights on the beginning – to Jitse P. van Dijk, Berrie Middel and Johan Groothoff on the side of University Medical Centre Groningen, and Andrea Madarasova Geckova, Iveta Rajnicova Nagyova, Zuzana Gdovinova and Jaro Rosenberger on the Slovak side of our Parkinson project. My particular thanks go to the persons responsible for all important “details” – Nicol Hendrichovska, Jarmila Fristikova, Martina Sukenikova and Ivana Borysova.

I would like to thank especially also to my supervisors, who were already mentioned – Jitse, Iveta, Johan, Jaro and Berrie - for sharing with me their experiences and for teaching me how to work effectively and how to be patient. Each of them helped me to better understand what it means to be a researcher.

My special thanks are also addressed to my colleagues from the Chronic Disease team, with whom we shared all aspects of the life of a “young researcher” – Martina Chylova, Eva Havlikova and Miriam Polanova. In addition, my thanks go to all KISH PhD students, with whom we shared a lot of interesting experiences on conferences, but also in non-formal events - Martina Chylova, Maria Sarkova, Zuzana Veselska, Eva Havlikova, Maria Humenikova, Maria Bacikova, Ferdinand Salonna, Ondrej Kalina, Zuzana Skodova, Maria Majernikova, Jozef Benka and many others.

My thanks belong also to management of Faculty of Education of the University of Presov for the stimulating environment and to my colleagues from the Department of Special Education for their huge support and their ability to laugh even when life is not always easy.

I would like to express my gratitude to all patients with Parkinson’s disease and neurologist as well - this project would not have been realized without their cooperation – for their willingness to donate us some hours of their lives.

Last, but not least, I want to thank my parents, my sister Maria and brother Peter, because they never doubt, that I will finish. Finally, I thank also you, A.M., for your love and trust.
