## **Effector mechanisms of ANCA-associated glomerulonephritis**

Printing of this thesis was financially supported by:

The university of Groningen

Graduate School for Drug Exploration (GUIDE)

University Medical Center Groningen

Friedrich Wegener Stichting

Dutch Arthritis Association

Array BioPharma Inc.

Hycult Biotechnology BV

The cover illustrates a medical specialist trying to extinguish the inflammation in blood vessels of patients with ANCA-associated glomerulonephritis. In the background, a scientific researcher is supporting this process by exploring potential new targets for better therapies.

Cover design: Sjoerd Andringa, Alkmaar

Lay-out: Peter van der Sijde, Groningen
