for my lovely parents in heaven

Truth alone is eternal, everything else is momentary. It is more correct to say that Truth is God, than to say that God is Truth. All life comes from the one universal sources call it Allah, God, or Parmeshwara. (Gandhi 1869 - 1948).

The studies described in this thesis were performed at the Faculty of Mathematics and Natural Sciences, Department of Pharmacokinetics and Drug Delivery, University of Groningen, The Netherlands.

This project was an exchange program between Department of Pharmacokinetics and Drug Delivery, University of Groningen, The Netherlands and Department of Pharmacy, Bandung Institute of Technology, Indonesia.

This research project was financially supported by a Merit Scholarship Programme for High Technology, Islamic Development Bank (IDB), Saudi Arabia, and by an Ubbo Emmius Scholarship, University of Groningen, The Netherlands

The printing of this thesis was financially supported by:

University of Groningen
Groningen University Institute for Drug Exploration (GUIDE)
Islamic Development Bank
BiOrion Technologies B.V.

Cover: *Back picture:* a collagen type III staining on liver section of BDL-1 rat (upper) and BDL-1 rat receiving M6PIL-10 treatment (lower). *Front picture:* an IL-10/IL-10 receptor interaction (adopted from Image Library of Biological Macromolecules).

Cover and layout: H.Rachmawati

Contents

Chapter – 1	Aim of the thesis	1
Chapter – 2	The use of cytokines and modified cytokines as therapeutic agents: present state and future perspectives	5
Chapter – 3	Pharmacokinetic and biodistribution profile of recombinant human IL-10 following intravenous administration in rats with extensive liver fibrosis	39
Chapter – 4	A study on the effects of IL-10 in anti-Thy 1-induced glomerulonephritis in rats	59
Chapter – 5	A study on the effects of IL-10 in anti-Thy 1-induced glomerulosclerosis in rats	79
Chapter – 6	Chemically modified IL-10 with a liver-specific ligand: a new strategy for the treatment of liver fibrosis with a therapeutic cytokine	105
Chapter – 7	Modification of IL-10 with M6P yields a liver-selective cytokine with antifibrotic activities in rats	129
Chapter – 8	Summary, conclusion, and future perspectives	155
Chapter – 9	Samenvatting	167
Appendix	Acknowledgements	180
	Contributing authors	184
	Awards	185
	Abbreviations	186
