On the Behaviour and Ecology of the Black-tailed Godwit

The research presented in this thesis was carried out at the Conservation Ecology Group, Groningen Institute for Evolutionary Life Sciences (GELIFES), University of Groningen, The Netherlands, according to the requirements of the Graduate School of Science and Engineering (GSSE). Printing of this thesis was supported by the University of Groningen.

The research in this thesis was funded by the Spinoza Premium 2014 of the Netherlands Organization for Scientific Research (NWO), with additional funding from an anonymous donor, the UbboEmmius Fund, the Gieskes Strijbis Fonds, NWO TOPgrant 'Shorebirds in space', Kenniskring Weidevogellandschappen of the Ministry of Agriculture, Nature Management and Food Safety (2012, 2016), the Province of Fryslân (2013–2018), the Univ. of Groningen. Prins Bernhard Cultuurfonds (through It Fryske Gea), the Van der Hucht de Beukelaar Stichting, the Paul and Louise Cook Endowment Ltd., BirdLife-Netherlands and WWF-Netherlands.

The preferred citation for this thesis is: Verhoeven M.A. & Loonstra A.H.J. (2020). On the behaviour and ecology of the Black-tailed Godwit. PhD Thesis, University of Groningen, Groningen, The Netherlands.

Contents

Chapter 1	General Introduction	8
Chapter 2	Variation From an Unknown Source: Large Inter-individual Differences in Migrating Black-Tailed Godwits	10
Chapter 3	Migration route, stopping sites, and non-breeding destinations of adult Black-tailed Godwits breeding in southwest Fryslân, The Netherlands	22
Chapter 4	Individual Black-tailed Godwits do not stick to single routes: a hypothesis on how low population densities might decrease social conformity	42
Chapter 5	Genetic parentage of the socially monogamous Black-tailed Godwit <i>Limosa limosa limosa</i>	50
Chapter 6	Geolocators lead to better measures of timing and reneating in Black-tailed Godwits and reveal the bias of traditional observational methods	54
Chapter 7	Variation in egg size of Black-tailed Godwits	68
Chapter 8	High migratory survival and highly variable migratory behavior in Black-tailed Godwits	78
Chapter 9	Adverse wind conditions during northward Sahara crossings increase the in-flight mortality of Black-tailed Godwits	90
Chapter 10	Natal habitat and sex-specific survival rates result in a male-biased adult sex ratio	98
Chapter 11	Generational shift in spring staging site use by a long-distance migratory bird	112
Chapter 12	Rethinking classic starling displacement experiments: evidence for innate or for learned migratory directions?	124
Chapter 13	Sex-specific growth in chicks of the sexually dimorphic Black-tailed Godwit	146
Chapter 14	Age-dependent timing and routes demonstrate developmental plasticity in a long-distance migratory bird	158
Chapter 15	Non-inherited factors shape adaptive potential in migratory routes and destination in a long-distance migrant	176
Chapter 16	General discussion	192
