# **TRAIL receptor-targeted therapy**

Strategies to enhance DR4- and DR5-induced apoptosis

**Ingrid A.M. van Roosmalen**

---

The research described in this thesis was conducted at the Department of Pharmaceutical Biology (Groningen Research Institute of Pharmacy, University of Groningen, The Netherlands) and the Department of Medical Oncology (University of Groningen, University Medical Center Groningen, The Netherlands) according to the requirements of the Graduate School of Science (Faculty of Mathematics and Natural Sciences, University of Groningen, The Netherlands).

The research in this thesis was financially supported by the Ubbo Emmius Scholarship programme.

Printing of this thesis was financially supported by the University of Groningen and the Groningen Graduate School of Science.

# TRAIL receptor-targeted therapy

Strategies to enhance DR4- and DR5-induced apoptosis

## Proefschrift

ter verkrijging van de graad van doctor aan de  
Rijksuniversiteit Groningen  
op gezag van de  
rector magnificus prof. dr. E. Sterken  
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op  
vrijdag 19 december 2014 om 16.15 uur

door

**Ingrid Antonia Maria van Roosmalen**

geboren op 20 juli 1983  
te Zoetermeer

**Promotores**

Prof. dr. W.J. Quax

Prof. dr. F.A.E. Kruyt

**Beoordelingscommissie**

Prof. dr. J. Borst

Prof. dr. R.P.H. Bischoff

Prof. dr. E. Vellenga

**Paranimfen**

Ellen J.H.J. van Roosmalen

## TABLE OF CONTENTS

<b>Chapter 1</b>	General introduction and Scope of the thesis	9
<b>Chapter 2</b>	Two death-inducing human TRAIL receptors to target in cancer: similar or distinct regulation and function?	19
<b>Chapter 3</b>	The ER stress inducer DMC enhances TRAIL-induced apoptosis in glioblastoma	43
<b>Chapter 4</b>	FUT3/6 differentially regulate death receptor-specific sensitivity to TRAIL in colon cancer cells	67
<b>Chapter 5</b>	The novel thymidylate synthase inhibitor trifluorothymidine (TFT) and TRAIL synergistically eradicate non-small cell lung cancer cells	89
<b>Chapter 6</b>	MAPK p38 and JNK have opposing activities on TRAIL-induced apoptosis activation in NSCLC H460 cells that involves RIP1 and caspase-8 and is mediated by Mcl-1	111
<b>Chapter 7</b>	Summarizing discussion and Future perspectives	131
<b>Appendix</b>	Nederlandse samenvatting	147
	Dankwoord	161
