Soil bacterial community assembly during succession

The research presented in this thesis was carried out at the Microbial Ecological Cluster, which is part of the Groningen Institute for Evolutionary Life Sciences (GELIFES) of the University of Groningen, The Netherlands.

Xiu Jia received a PhD grant from the China Scholarship Council (CSC), the Chinese Ministry of Education and a top-up PhD Scholarship from the University of Groningen. The printing of this thesis was partly funded by the University of Groningen and the Faculty of Science and Engineering of the University of Groningen.

 groningen

Soil bacterial community assembly during succession

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 12 February 2021 at 14.30 hours

By

Xiu Jia

born on 25 August 1990
 in Inner Mongolia, China

Supervisors

Prof. J. Falcão Salles

Prof. J.D. van Elsas

Co-supervisor

Dr. F. Dini-Andreote

Assessment Committee

Prof. T. Curtis

Prof. B. Teusink

Prof. R. Etienne

To the memories of my grandmothers

Contents

Chapter 1	General introduction	9
Chapter 2	Molecular methods to study microbial succession in soil	19
Chapter 3	Comparing the influence of assembly processes governing bacterial community succession based on DNA and RNA data	33
Chapter 4	Community assembly processes of the microbial rare biosphere	57
Chapter 5	Unveiling the interplay of ecological processes shaping the bacterial rare biosphere	71
Chapter 6	Effect of dispersal by inundation on soil bacterial communities depends on soil developmental stage	99
Chapter 7	Synthesis	119
	References	128
	Summary and Nederlandse Samenvatting	148
	Acknowledgements	155
	About the author	158
