**Selective Catalytic Oxidations by
Palladium and Manganese**

Selectivity, Reactivity and Mechanistic Studies

Jia Jia Dong

university of
 groningen

faculty of mathematics
 and natural sciences

The work described in this thesis was carried out at the Stratingh Institute for Chemistry, University of Groningen, The Netherlands.

This work was supported financially by Smartmix programme CatchBio of the Ministry of Economic Affairs and the Ministry of Education, Culture and Science of the Netherlands (Project No. 053.70.214).

Selective catalytic oxidations by palladium and manganese

Selectivity, reactivity and mechanistic studies

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 30 January 2015 at 14.30 hours

by

Jia Jia Dong

born on 7 December 1984
 in Jiangsu, China

Supervisors

Prof. W.R. Browne

Prof. B.L. Feringa

Assessment committee

Prof. X. Ribas

Prof. A.J. Minnaard

Prof. R.J.M. Klein Gebbink

Table of contents

Chapter 1 Selective catalytic oxidations: From palladium-catalysed *anti*-Markovnikov oxidation of terminal alkenes to manganese catalysed oxidations with H₂O₂

1.1 Introduction	2
1.2 The role of solvent in <i>anti</i> -Markovnikov oxidations	4
1.2.1 AM oxidations in DMF and acetonitrile	4
1.2.2 AM oxidations in alcohols as solvent	9
1.3 Ligand-directed Pd(II) catalysed oxidations	11
1.3.1 Palladium nitrite system	11
1.3.2 Other ligands	14
1.4 Oxidants	16
1.5 Conclusion and outlook for <i>anti</i> -Markovnikov oxidation of terminal alkenes	16
1.6 Goals and outline of thesis	17
1.7 Bibliography	20

Chapter 2 Pd-catalysed selective *anti*-Markovnikov oxidation of allylic esters

2.1 Introduction	24
2.2 Results and discussion	25
2.3 Experimental Section	30
2.3.1 General Procedures and methods	30
2.3.2 Preparation of substrates	30
2.3.3 Optimisation of conditions for catalysed oxidation reactions	32
2.3.4 General procedures for catalysed oxidation of allylic esters	35
2.3.5 Characterisation of products and substrates	36
2.3.6 Offline ¹ H NMR spectroscopic analysis	41
2.3.7 Oxidation of enantiopure protected allylic alcohol	41
2.4 Bibliography	42

Chapter 3 Palladium catalysed *anti*-Markovnikov oxidation of allylic amides to protected β-amino aldehydes

3.1 Introduction	46
3.2 Results and discussion	47
3.3 Conclusions	53
3.4 Experimental Section	53
3.4.1 General Procedures and methods	53
3.4.2 Preparation of Substrates	54
3.4.3 Characterisation of products	56
3.4.4 Enantioselective Synthesis of Protected β-Amino Aldehydes by Rearrangement / Oxidation	59
3.4.5 Synthesis of β-Peptide-Aldehydes	60
3.4.6 Role of alcohol as nucleophile	61
3.4.7 Stability of tertiary alcohols toward dehydration under reaction conditions	66
3.4.8 Reactions carried out with and in deuteriated <i>t</i> -BuOH	68
3.5 Bibliography	70

Chapter 4 Mechanistic insight into the <i>anti</i>-Markovnikov oxidation of alkenes	
4.1 Introduction	74
4.2 Results and discussion	76
4.2.1 Interaction of the Pd(II) catalyst with substrate	76
4.2.2 Role of oxidant in the Pd(II) catalysed oxidation of alkenes and suppression of isomerisation reactions	81
4.2.3 Evidence for complexation of Pd(II) with <i>p</i> -benzoquinone	84
4.2.4 Insight in the mechanism from substrate scope	85
4.3 Summary and conclusions	86
4.4 Experimental section	87
4.5 Bibliography	87
Chapter 5 Oxidation of alkenes with H₂O₂ by an <i>in situ</i> prepared Mn(II)/pyridine-2-carboxylic acid catalyst and the role of ketones in activating H₂O₂	
5.1 Introduction	90
5.2 Results and discussion	92
5.2.1 General reaction conditions and optimisation	92
5.2.2 Oxidation of acid/base sensitive alkenes	94
5.2.3 Oxidation of conjugated and non-conjugated dienes	94
5.2.4 Oxidation of alkenes bearing multiple functional groups and allylic stereocenters	95
5.2.5 Solvent dependence and scope	97
5.2.6 Mechanistic considerations	97
5.2.7 Role of ketone in the catalytic reaction	98
5.3 Conclusions	100
5.4 Experimental	100
5.4.1 Materials and Methods	100
5.4.2 Optimisation of conditions for catalytic oxidation of cyclooctene, α -pinene and diethyl fumarate	101
5.4.3 Procedures for catalytic oxidation of alkenes described in schemes 1, 2, 4-7 and 9 and characterisation of products	102
5.4.4 Procedure for catalytic oxidation of α -pinene followed by <i>in situ</i> isomerisation and product characterisation	115
5.4.5 Procedures for the catalytic oxidation of electron deficient alkenes and product characterisation	117
5.4.6 Retention of chirality in allylic alkenes	117
5.5 Bibliography	119

Chapter 6 Manganese catalysed selective oxidation of aliphatic C-H groups and secondary alcohols to ketones with H₂O₂	
6.1 Introduction	122
6.2 Results and discussion	123
6.3 Conclusions	127
6.4 Experimental Section	128
6.4.1 General Procedures and methods	128
6.4.2 Examples of reactions at > 1g scale	129
6.4.3 Characterisation of isolated products	129
6.5 Bibliography	132
English Summary	135
Nederlandse Samenvatting	139
Acknowledgements	145
