Acknowledgements

Time flew to the end of my PhD although I still feel that I am a new student in the group. I don't hesitate to say that this has been an excellent experience in my life. Therefore, I would like to express my thanks to the people who support me during this great time.

First of all, I am very grateful to my supervisor Wes. Thank you for always helping my research and many other problems. Your great and brilliant ideas have inspired me for my project especially when I was stuck in some stages. On the other hand, you always accept my different opinions even after excited discussions. I appreciate that you provide a quite democratic and free atmosphere in the group that I could almost complain about anything to you and ask for your help. Furthermore, you always try to teach me presentation skills and English and I hope that I have improved a little bit since my first presentation over 4 years ago.

Ben, thanks you for interviewing me and giving me the chance to work for my PhD project together with Wes and you. You have encouraged me a lot in my research and gave good advice. You always give me time when I need your help or discuss with you despite that you are always very busy. I especially appreciate your efficient and helpful correction on my manuscript, which was always critical in general but never missed on the details.

Matt, thank you for accepting me as the visiting researcher to University of Utah. This was great time and I am proud that I have had the experience of working in your group. I always enjoyed your lectures and attending your group meetings as they were challenging and fun. At this moment, I also express my thanks to all your group members for their help when I stayed in your lab, especially thanks to Tyson for teaching me techniques in the lab and useful discussion about work and about life.

I am grateful to my Master supervisor Dr. Henri Doucet at the University of Rennes 1, not only for encouraging me to pursue a PhD, but also for his guidance and training during my Masters period, and for giving me the confidence to pursue a research career.

I thank very much my reading committee Prof. Adria Minnaard, Prof. Bert Klein Gebbink and Prof. Xavi Ribas for their fast reading, suggestions and approval of my thesis.

My thanks go to Martin and Emma for their great contribution on palladium catalysed oxidations, and Appu for mechanistic studies, which are still continuing. I enjoy working with each of you and learnt a lot as you are experts in very different areas.

I express my deepest thanks to Tim, Pat, Duenpen and Francesco whom I worked with on the picolinic acid projects, and to Dr. Paul Alsters at DSM for his collaboration throughout my PhD.

I appreciate very much the suggestions and comments given by a lot of people during various meetings. Thanks to Wiktor and Depeng for very helpful suggestion on palladium catalysed oxidation. Syuzi, Katalin, Gerard and Edwin: thank you for all the useful discussion and suggestions over the past four years.

I of course thank the people that supported my project in a wider sense, specifically the CatchBio group: Dr. Paul Alsters, Dr. Lavinia Panella and Dr. Bernard Kapteijn for all the

advice and discussion during progress meetings (they made up for the 4 h in the train to Lunteren I had to spend with my supervisor twice a year!); Prof. Hans de Vries, thank you for organizing the Catchbio subgroup meetings and providing a good chance for discussion with the Groningen Pd community.

I sincerely express my thanks to Alphons for solving my trivial financial problems with patience. Cristina, thank you for pushing Wes to correct my thesis - it worked very well. ☺ And Thanks Hilda, Annette and Tineke for all the help over these years.

I thank my paranimfs, Dr. Emma and Dr. Appu, for all their help over the last years. Appu, I always want to have your positive attitude to work and life and we could easily get agreement during these years. Emma, drinking and having dinners with you is fun especially after many boring lectures and thanks a lot that you always support me no matter how much I complain. ☺

Derk, Hans and Luuk, thank you very much for translating my summary into Dutch. Thank you Prof. Jan Engberts for the correction my Stellingen and Dutch summary.

I am very grateful to the present and former members of brownie's group: Hans (for all the problems in the lab and research), Shaghayegh (to be my female close colleague for longest time), Pat (really good sharing food partner), Peter (for providing place for international dinners), Davide (interesting chats and you are always kind to help people), Duenpen (as my Thai little sister), Juan (for replacing me in the group ☺), Sandeep, Luuk, Tjalling, Federico, Maggi, Jorn, Kasper, Hella, Nikki, Heloise, Erik, I enjoyed the coffee breaks and all the activities outside the lab we have had during the past a couple of years.

I would like to thanks many colleagues from the Stratingh institute for all their help: Adi (for reminding Wes to check his email during my PhD application), Manuel (sharing all the meetings of Catchbio), Danny (for teaching me to use the instruments in the Linnaeusborg), Valentin, Anne, Sebastian, Massimo, Suresh, Stefano, Francesca, Kris, Jeffery, Manuela, Rik, Jens, Sambika, Fiora, Ana, Almudena, Pim and all the people from Feringa, Roelfes, Minnaard and Otto's group.

Thanks to my good friends Yang and Qian for helping and accompanying me to adapt the culture and life here at beginning of my PhD. I had a happy time with you sharing food and chatting during the weekends.

I would like to thanks to Zheng, Depeng, Bin, Zhiyuan, Jiaobing, Xiaoyan, Lily, Tao, Zongtao, Jiawen, Lifei, Jianwei and Jie as my Chinese activities friends for many activities and dinners together. Thanks to you all being here.

I also would like to thank my good friends not in Groningen: Shi for always chatting and arguing with me, Lixian, Shuqin, Yinyi, Mengxiao etc. Thank you for the good times together and friendship.

Derk, I feel safe to stay with you all the time. Thank you for all the support and patience with me. I wish that I will learn more from your peaceful mood and good temper in the future as I am always a grumpy lady. ☺

Finally the greatest thanks should be given to my parents. 感谢我爸妈对我辛勤养育，无私支持，我永远爱你们。我也要谢谢我大伯一家，我姑妈姑父，总是对我很关心爱护。
