Photochromic Molecular Switches

Based on Azobenzenes, Dithienylethenes and
Hemithioindigos

Jort Robertus

Photochromic Molecular Switches Based on Azobenzenes, Dithienylethenes and Hemithioindigos

Jort Robertus

Ph.D. thesis

University of Groningen, The Netherlands

The research described in this thesis was carried out within the Stratingh Institute for Chemistry, University of Groningen, The Netherlands

In compliance with the requirements of the Graduate School of Science of the Faculty of Mathematics and Natural Sciences, University of Groningen, The Netherlands.

This research project was financially supported by NanoNed and ERC grand 227897

Printed By Ipskanp drukkers B.V., Enschede, The Netherlands.

Cover: Millipede (V5), Horse Pens 40, Alabama, USA.

ISBN: 978-90-367-7607-3 (digital)

978-90-367-7608-0 (printend)

Photochromic Molecular Switches

Based on Azobenzenes, Dithienylethenes and Hemithioindigos

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdedigen zal plaatsvinden op

vrijdag 13 februari 2015 om 16:15 uur

door

Prof. dr. K. Uchida

Prof. dr. S. Otto

In memory of Michael M. Pollard

22 December 1973 – 27 February 2010

...By now, you are likely waist-deep into the throws of the epic battle of a PhD – a journey that truly mimics a first-ascent with multiple attempts, through different approaches, backing off only to return again with redoubled efforts, suffering at being rebuked, and elation at moving past what was once an intractable problem. In both, tenacity and determination are as crucial as skill and talent...

Table of Content

1 Photochromic Switches for Controlling Surfaces: Properties and Function	5
Introduction	6
Photoisomerization	7
Stilbenes	7
Overcrowded alkenes	8
Azobenzenes	10
Thioindigo switches	11
Hemithioindigo switches	12
Photocyclization	13
Spiropyrans	13
Fulgides	13
Dithienylethenes	14
Conclusions	17
Thesis outline	17
References	18
2 Dynamic Control over Cell Adhesive Properties using Surface Engineering Strategies	21
Introduction	22
Self assembled monolayers for cell adhesion	23
Bio-Inert Self Assembled Monolayers	24
Mixed Self Assembled Monolayers	24
Strategies for cell adhesion to artificial surfaces	24
Dynamic control of cell adhesion on SAMs	25
Electrochemically switched surfaces	25
Electrochemical desorption	26
Light controlled desorption	36
Electrochemically controlled tethering of peptide ligands	44
Electrochemically controlled cell adhesion	44
Electrochemical Switching of Cell Adhesiveness	50
Chemically regulated cell adhesion to SAMs	60
Supramolecular control over cell adhesion to SAMs	61
Dynamic cell responsive SAMs	63
Dynamic control of cell adhesion on thin polymeric films	65
Photo responsive control over cell adhesion	65
Enzyme controlled cell adhesion	69
Concluding remarks	70
References	71
3 Kinetic Analysis of the Thermal Isomerisation in a Double Azobenzene Switch	75
Introduction	76
Synthesis and characterization	78
Synthesis	78
Characterization of photochemical and thermal isomerization	79
Identification of the PSS mixture of switch 2	84
Photochemical <i>Z</i> to <i>E</i> isomerization of switch 2	86
Thermal behaviour of <i>Z</i> to <i>E</i> isomerization of switch 1	87

Thermal behaviour of <i>Z</i> to <i>E</i> isomerization of switch 2	88
Fitting model for the kinetic analysis of thermal <i>Z</i> to <i>E</i> isomerization of switch 2	88
Quantum chemical study of thermal <i>Z</i> to <i>E</i> isomerization of switch 2	92
Discussion	93
Conclusions	96
Experimental section	96
Acknowledgment	99
References	100
4 Photochemical Study of Hemi-Thioindigo Photoswitches	103
Introduction	104
Synthesis and characterization	105
Synthesis	105
Structural characterization	106
Photochemical and thermal properties	109
Conclusion	125
Experimental section	125
Acknowledgment	131
References	131
5 Electrochemical Characterization of Hemi-Thioindigo Switches	133
Electrochemical switching	134
Electrochemical behavior of stilbenene switches	134
Electrochemical behavior of thioindigo switches	137
Electrochemical switching of HTI switches	140
Results and discussion	141
Conclusion	152
Experimental section	153
Acknowledgment	154
References	154
6 Towards a PALM probe for imaging gold nanoparticles in living cells	157
Introduction	158
Gold nanoparticles	158
Photo activated localization microscopy	158
Photoswitchable fluorescent probes	161
Towards a PALM probe for imaging gold nanoparticles in living cells	164
Design	164
Synthesis and characterization	165
Synthesis	165
Preparation and characterization of functionalized Au nanoparticles	167
Characterization of the photochemical properties of 3 and 4	169
Fluorescence switching of 4 in LAD2 cells	174
Discussion	177
Conclusion	178
Experimental section	179
Acknowledgment	187
References	187

7 A Mild Titanium-mediated transformation of <i>t</i>-butyl thio-ethers into thio-acetates	189
Introduction	190
Results and Discussion	191
Conclusions	194
Experimental details	195
Acknowledgment	200
References	200
Perspectives	203
Summary	209
Samenvatting	213
Acknowledgments	217
