# **Morphological Aspects in Recurrent Prostate Cancer**

**On molecular imaging for local salvage treatment**

**Maxim Rybalov**

The research presented in this thesis was performed at the departments of Urology, Pathology and Nuclear medicine of the University Medical Center Groningen and the Department of Urology of the Pavlov Saint-Petersburg State Medical University. Part of the thesis was performed in collaboration with the Center of Molecular Medicine project PCMM 030-203.

The research was financially supported by the University of Groningen, the Departments of Urology of the UMCG and the Pavlov Saint-Petersburg State Medical University and the PCMM 030-203 project.
