Evolutionary genetics and dynamics of transitions in sex determination

Martijn A. Schenkel

This research has been carried out in the Evolutionary Genetics, Development & Behaviour (EGDB) and Theoretical Research in Evolutionary Life Sciences (TRÊS) groups at the Groningen Institute for Evolutionary Life Sciences (GELIFES) according to the requirements of the Graduate School of Science and Engineering (Faculty of Science and Engineering, University of Groningen; Groningen, The Netherlands).

This research was supported by an Adaptive Life Program grant awarded to L.W. Beukeboom, I. Pen, and J.-C. Billeter made possible by the Faculty of Science and Engineering of the University of Groningen and the Groningen Institute for Evolutionary Life Sciences (GELIFES).

Cover design and layout: Martijn Alexander Schenkel.
