toward  
**Podophyllotoxin**

**Christel Seegers**

The research described in this thesis was carried out in the Department of Chemical and Pharmaceutical Biology (Groningen Research Institute of Pharmacy, University of Groningen, the Netherlands) according to the requirements of the Graduate School of Science (Faculty of Science and Engineering, University of Groningen, the Netherlands).

This work was supported by European and regional funding. The PhytoSana project in the INTERREG IV A Deutschland-Nederland program: 34- INTERREG IV A I-1-01=193; and the Disposable Bioreactoren project in the Innovatief Actieprogramma Groningen: IAG3-D02.

Printing of this thesis was financially supported by the University Library and the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, the Netherlands.

# Production routes toward podophyllotoxin

## Proefschrift

ter verkrijging van de graad van doctor aan de  
 Rijksuniversiteit Groningen  
 op gezag van de  
 rector magnificus prof. dr. C. Wijmenga  
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 28 mei 2021 om 12.45 uur

door

**Christina Lamberta Catharina Seegers**

geboren op 11 juni 1989  
 te Grubbenvorst

**Promotor**

Prof. dr. W.J. Quax

**Beoordelingscommissie**

Prof. dr. K. Taxis

Prof. dr. J.T.M. Elzenga

Prof. dr. S. Sukrasno

## Table of contents

<b>Chapter 1</b>	Introduction and scope of this thesis	7
<b>Chapter 2</b>	Toward metabolic engineering of podophyllotoxin production	15
<b>Chapter 3</b>	Transcriptome analysis of <i>Podophyllum hexandrum</i> and functional expression of cytochrome P450 monooxygenases and NADPH-cytochrome P450 reductases in <i>Escherichia coli</i>	39
<b>Chapter 4</b>	Cytotoxic deoxypodophyllotoxin can be extracted in high purity from <i>Anthriscus sylvestris</i> roots by supercritical carbon dioxide	71
<b>Chapter 5</b>	Disposable bioreactor with integrated oxygen sensors for production of secondary metabolites in plant cell cultures	95
<b>Chapter 6</b>	Methyl jasmonate treatment increases podophyllotoxin production in <i>Podophyllum hexandrum</i> roots under glasshouse conditions	111
<b>Chapter 7</b>	Summary and future perspectives	133
<b>Appendix</b>	Nederlandse samenvatting	143
