Erratum

Erratum to: “Approach to the Patient: Perioperative Management of the Patient with Pheochromocytoma or Sympathetic Paraganglioma”

Received: 17 September 2020; First Published Online: 28 September 2020; Corrected and Typeset: 27 October 2020.

In the above-named article by Berends AMA, Kerstens MN, Lenders JWM, and Timmers HJLM (*J Clin Endocrinol Metab.* 2020; 105(9):3088–3102; doi: 10.1210/clinem/dgaa441), the following errors occurred during the production process in the published paper.

In Table 1, in the Drug column, a blank line between metyrosine and metoprolol was omitted.

In Table 2, in the Indication column, the indications and steps were not properly aligned with the drugs and doses.

In Table 3, in the Comments column, the comment “Cause histamine release, thereby provoking catecholamine

release, associated with severe arterial hypertension and ventricular arrhythmias” was not properly aligned with Atracurium, Tobucurarine, and Mivacurium. The comment “These opioids cause histamine release, thereby provoking catecholamine release” was not properly aligned with Morphine, Hydromorphone, and Pethidine. The proper heading style was lacking for the headings “Neuromuscular blocking agents,” “Anxiolytic agents,” “Analgesic agents,” “Antiemetic agents,” and “Miscellaneous.”

The tables have been corrected online.

The publisher acknowledges the errors.
