Complement modulation to improve donor organ quality

Interventions during brain death and normothermic machine
perfusion

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

maandag 21 juni 2021 om 14.30 uur

door

Neeltina Margaretha Jager

geboren op 30 oktober 1992
te Groningen

Promotores

Prof. dr. H.G.D. Leuvenink
Prof. dr. J.L. Hillebrands

Copromotor

Dr. M.A.J. Seelen

Beoordelingscommissie

Content

Chapter 1	Introduction	8
Chapter 2	Complement in renal transplantation: the road to translation <i>Molecular Immunology; 2017</i>	22
Chapter 3	Deficiency of early complement component C4 protects against renal injury and inflammation in a mouse brain death model <i>In submission</i>	58
Chapter 4	Brain death-induced lung injury is complement dependent with a primary role for the classical/lectin pathway <i>American Journal of Transplantation; 2020</i>	86
Chapter 5	Complement is activated during normothermic machine perfusion of porcine and human discarded kidneys <i>In preparation</i>	106
Chapter 6	Complement therapeutics in the multi-organ donor: do or don't? <i>Frontiers of Immunology; 2019</i>	128
Chapter 7	C1-inhibitor treatment decreases renal injury in an established brain death rat model <i>Transplantation; 2018</i>	158
Chapter 8	Blocking complement factor B activation reduces renal injury and inflammation in a rat brain death model <i>Frontiers of Immunology; 2019</i>	178
Chapter 9	Summary, discussion and future perspectives Samenvatting, discussie en toekomstperspectieven	200 222
Appendix		246
	Abbreviations	248
	Dankwoord	252
	Over de auteur	256
