ACKNOWLEDGEMENTS

Time flies, indeed that is true. Years, days, hours, minutes; all that we can objectively count, starts and flies to an end. But the duration, the sense of the duration of these past years has given me off and on a “time stands” feeling. I had some moments that I just felt time stood still and even stopped, where I just could see this enormous feeling in my stomach of “exploration” of life, of self, of things. As time was flowing with its own very existence, a non-stop flow, a nourishing flow... The whole story of my Ph.D. has been quite the journey, not only here in Groningen but also including my previous experiences back then, was very unique and new which fed my personality with such a crowd of unusual experiences and feelings that I feel as now I reached a state of consciousness which I see my current self is more entire and sole as well more joyful. And of course, years of Ph.D., this unique and incredible stage of my life would not have been possible without the support of numerous people which I hope to thank here.

Foremost, I would like to thank you **Patrick** for believing in me. I am forever grateful for the perfect balance of guidance and freedom that you gave me over the years. You always trusted me and gave me the independence to pursue the research I was interested in which then allowed developing myself, both scientifically and personally. You offered great conversations about life and science and you were always available with great excitement for discussions about my research and future life plans. You always encouraged me to have different opinions and discuss them freely and when we had disagreements, in the end, all our discussions turned out to be very fruitful.

Dear **Henny**, thank you very much for allowing me to start my Ph.D. in the BME group. You are one of the most central figures in my Ph.D. and I genuinely appreciated all the scientific and non-scientific discussions we had. I am really grateful for all the time you dedicated to me especially for biology experiments and correcting my manuscripts; you had a major impact on my research. As a chemist, it was sometimes difficult to understand the meaning of all those biology experiments; nevertheless, you showed me what a great teacher you are with a lot of patience. Moreover, I enjoyed so much our talks during the conference in New York and also the barbeque at your home; you have such a great sense of humor. Thank you very much for all your support which means a lot to me.

I would like to thank the members of the assessment committee: **Prof. Sébastien Lecommandoux**, **Prof. Romana Schirhagl** and **Prof. Marleen Kamperman** for evaluating and accepting my thesis. Many thanks to the jury members: **Prof. Petra Rudolf**, **Prof. Freek Kapteijn** and **Prof. Anna Salvati** for reading my thesis and taking a part in the ceremony.

I also would like to thank some crucial people who supported me on different stages during my research life and contributed with their expertise. **Prof. Krzysztof Matyjaszewski**, thank you very much for accepting me as an external Ph.D. researcher in your group in CMU; even though it was remotely, working with you was one of the greatest opportunities

and pleasure for me. Moreover, I really appreciate your effort during the pandemic to find an alternative solution once it became clear that I could not come to the US. Eddy, I am really grateful that you welcomed me to your group in ETH Zurich and EMPA despite the difficult conditions of the pandemic. I really enjoyed learning and working under your supervision. Thank you Dr. Matteo Romio, for all the help during my research stay in Switzerland.

Prof. Freek Kapteijn, Prof. Jorge Gascon and **Dr. Beatriz Seoane**, it was a great pleasure to work with you back then in Delft. I enjoyed it a lot and learned tremendously from being a member of your group. Thank you for showing me how to make excellent research at the beginning of my scientific career. Dear Freek, thank you so much for your understanding when I was at the edge of taking important decisions, without your support I could not find the courage to take a step. Beba, the same goes with you, thank you very much for always making me feel supported and being on my side. Working with you was one of the most fun and fulfilling thing in my entire learning/researching cycle.

Many thanks to **Dr. Gertjan Heijman** from Douwe Egberts for valuable collaboration during my Ph.D studies. It was a pleasure for me to be a part of this industrial participation and to benefit from your expertise in the field.

Dr. Volkan Filiz and **Dr. Juliana Clodt** from Helmholtz Zentrum Hereon, **Prof. Alexander Kuhn** and **Prof. Valérie Ravaine** from ENSCBP, **Dr. Frederico Maia** from Smallmatek, I am very glad that I met you during my research path. I believe you have a great impact on me and thank you very much for your support. **Prof. Zehra Altuntas Bayir**, you supported me since the very first year of my bachelor studies, your support over the years helped me a lot, thank you really very much.

This thesis could not be definitely completed without the help of **Dr. Olga Mergel**. Olga, you have been not only an amazing friend, but you were also a great mentor. You assisted me during my second and third year of my Ph.D. with your endless patience and contributed to the scientific development of this thesis, enormously. I really learned a lot from you and enjoyed every second in Groningen with you. I hope to grab a pint with you soon!

I would like to thank one of the important pillars of BME, to our technicians: **Jelly, Willy, Betsy, Marja, Gesinda** and **Hans** thank you for all the support and kindness. **Minie** and **Willem**, my microbiology lab coaches, I cannot thank you enough. You both thought me everything about bacteria and microbiology lab techniques in the most quality way possible. **Willem**, your guidance during this Ph.D. is so valuable, I could not perform any of these biology experiments or contribute to discussions about microbiology if you were not teaching and helping me. Dear **Joop**, since the beginning of my time in the BME department, whenever I needed help, I came to you first. Besides you are a great AFM and XPS expert, you are also a great person to have nice conversations about life; thank you so much and I really appreciate your patience. **Ed** and **Ina**, your energy and your dedication to helping people have made a great impression on me and I am really thankful for your all support during these years.

I also would like to thank the amazing people who I had the chance to meet in the department: **Sara Lu, Thais, Olga C., Lais, Valentina, Eliza, Abby, Yuchen, Alina, Kecheng, JP, Qihui, Lei Li, Liang Liang, Lu Ge, Mohammad, Olga S., Viraj, Aldona, Jeroen, Maria Isabel, Rene, Vera, Rebecca, Yori, Kiran, Simon, Colin, Xiaoxiang, Hongping, Yuanfeng, Huaying, Brandon, Tania, Filipa, Linzhu, Gwenda, Thea, Alejandro, Neda, Klaudia, Ke Ren, Hao, Ruifang, Zhiwei, Linyan, Kaiqi**... It was a great pleasure to know all of you in BME and I hope we will be keeping in touch in the future. **Torben**, you deserve a special mention, thanks for your help with the summary translation and our enjoyable talks about cats.

I thank my students **Claudia, Lisa** and **Devlina**. It was very enjoyable to mentor you and I learned a lot from you. Thank you Lisa for all the passion you put into the project even though we had some difficulties with nanogel coatings at that time.

I have to thank also all the friends and beautiful people I met here in the Netherlands within the ALERT program: **Elisa, Patricia, Jan, Piermichele, Nicola, Harita, Francis, Laszlo, Xintong, Miancheng** it is so nice to meet you all in Groningen. **Elisa**, here of course you deserve special thanks; my roomie during the first one-and-a-half year in Groningen! How can I forget all the special memories that we had together at home? Thank you for sharing the home with me; I think in the end we came to know each other very well and all I remember now from these times are just 'incredible' delightful moments.

Jara, thank you very much for being such a good and supportive friend over the years. I will always remember our Delft days with a big smile. **Aryan** and **Thamir**, I am very thankful for having found you in BME. I believe we have a very special connection beyond only work and words. I loved our regular meetings outside work and I always cherished your existence in the department. I am very sure that we will be seeing each other doesn't matter wherever we are. Thank you so much, **Clio**, you have made the last year of my Ph.D. so much more fun! Your constant support, positive energy and our endless conversations have helped me move forward numerous times. I really cherish the beautiful and fun time we spent together in; all our discussions about life and so on were very nourishing for me.

Matheus, Yanyan and **Yong**, I can for sure call you as my first family here in Groningen; upon arriving in the department, it just happened that we found each other in the so-called big office. Then the fun started! We shared terrific experiences all together... **Matheus**, we had a very special understanding between us beyond the language, and our energy together!! No words can describe that indeed! The time spent with you here was just joy and fun and beautiful!! Besides our craziness, you were definitely a role model for me as a researcher, my dear; thank you very much for being there for me. Te amo muito. **Yong**, your friendship was so light and nourishing; your silence and calmness – my talkativeness and definitely not being silent; yet there we could connect even more. I am still missing you since you left but we kept in touch despite the distance, and I am very grateful for it. I learned plenty of chemistry from you, of course. **Yanyan**, I think I have the biggest luck just by meeting you and having you in my life. So, we started this journey together from the very first day until the last day, yet here we are still together. There are plenty of amazing stories and a mountain

of experiences we shared together; and I just love you so much and I am very grateful to you that you have been always by my side for years, my dear. Thank you! **Luciani**, I am so happy that our ways crossed here in the big office right after Matheus left, and you and me, we just got an instant connection between us. All the moments we spent together were so precious that I am missing every single day and I thank you very much for always supporting me, you have a very big place still in my heart, my beautiful Lu. **Mari**, you being in BME is one of the best things that happened to me and I am really thankful for every day we spent together in Groningen. I hope we will have many more years to be together here! **Guangyue**, I wish you were here, I wish it since you left almost every single day. It has been wonderful to do a part of my Ph.D. with you; as you already know, all my projects and my work became a lot more fun when we started working together. We achieved a lot of things together, we supported each other like hell!! Not only about work, but about all the aspects in this life, all... It was a pleasure and just pure fun and joy to get to know you. You were an amazing friend Gu, and this will never change. A big thank you for everything! **Roberto**, my friend, we met during the first months of our Ph.D. and we have stayed friends since then. Our coffee breaks together, almost every single day at UMCG was just so valuable and deep for me and I am so grateful for your understanding, sharing and encouragement in many possible ways during these years. **Lena**, being around you brings huge joy to me; thank you for the super nice moments we shared together in Groningen, I look forward to our continued friendship doesn't matter wherever we are. **Jacopo**, grazie mille! For being such a nice roommate at the beginning of our lives in Groningen, and for being such an amazing friend continuously. I thoroughly loved all the precious time we spent home; days and days sitting down together and talking about issues that are important to us, and of course mostly about politics, about humanity, about the world, -within our very similar, unique, and well-aligned sensitivity. We connect and comprehend each other way beyond... Ti amo! I wanna keep you close forevermore.

Duygu, first of all, thank you very much for the great artwork that you created for this thesis. All your drawings are wonderful Duygu, truly incredible! I still love looking at the small details and trying to understand the meanings of all the tiny tiny drawings. And now about us: The unbearable lightness of having found you in Zurich -after 10 years or so; I am -and will be- enjoying every single second of your friendship; no more words..

Mervem, you are an incredible human being! I really cannot express my gratefulness towards you here with words, I love you so so much and thank you so much Merve for all your all effort and support you showed me in the last eight years.. We walked together during these years always side by side and we have gazillions of true-life experiences together and I appreciate every moment. **Mert** canim, we more or less started at the same time to our journey being abroad and we are still together after many years. You cannot imagine how much I am grateful for your endless support, and I really mean it very sincerely. Without you, I could not survive the difficult times, for sure. Thank you very much for all, my friend; all these things mean a lot to me and I would never forget. **Burakcim**, since we met in Delft, you were always near me. I appreciate a lot our deep conversations last hours and hours, my dear friend. Thank you for being so close by and supportive. **Ezgi**, I am so thankful for

having met you in Switzerland! We could talk/share about almost all the delicate topics – within our all craziness- and we could understand each other so deeply; it still makes me feel that like I've known you for a long time even though we only spent 2 months together. **Ekin**, thank you so much for years and years for sticking with me; I am very sure one day we will end up living in the same city and I am really looking forward to this, canımsin. **Milica**, you were an amazing friend and big support during whole these years, I am truly appreciated you being in my life. I think I learned a lot from you about how to appreciate life and accept it as it is. It was a stroke of great luck that we met in Bordeaux and I am so happy we kept our friendship until today. Your kindness is beyond the words, I love you!

Gürmen Çakırkaya, I cannot tell how much I am thankful for providing the financial support and for this enormous help that I needed to start my research career. I owe you gratitude and so much more. **Dilan** and **Sinem**, you may never realize how helpful and important you have been in the past. I needed help, and you were there at exactly the right time in the right way. Thank you really really so much, iyi ki varsınız.

Canlarım, **İklil**, **Nagihan**, **Meric**, **Alev**, **Onur Berk**, **Oral**, **Gulce**, **Melike**, **Ege**, I also would like to show my gratitude to you, my beautiful friends. For years and years, we never stopped supporting each other, no matter what. Even though we are quite far from each other, we kept sharing this life together, somehow. I am so grateful for having you in my life. Thanks for all the support you have never stopped giving me, thank you very much, my dear precious friends. I love you all. I could not finish this Ph.D. without your being and support, that would not be possible.

Reinier and **Taraneh**, thank you very much for your support especially in the last months. Canım **Taraneh**, your friendship means a lot to me; your existence in my life here in Groningen is too valuable that I cannot even explain it with words. I utterly cannot imagine these years without you. I am filled with gratitude for your all love and support that you showed me since the very first day we met. I love you. **Reinier**, I still cannot understand how you can bear the real me, the real Damla, the unbearable one! I adored every single moment, every joke, every foolishness and all the fun we shared together in the department and I wish we would have many more.. Sometimes you are afraid that I will leave Groningen but I am also sure that I will always be around, you cannot get rid of me. Thank you for being this amazing friend!

Teyze, bugünlere kadar hep bana destek oldun ve sevgini asla esirgemedin, bütün yardımların için çok teşekkür ederim. **Abla**, gösterdiğin tüm destek için sana da içten teşekkürlerimi sunuyorum, iyi ki varsın. **Annecim** ve **Babacım**, iyi ki varsınız ve sizi çok seviyorum; benimle gurur duyduğunuzu ve beni düşünüp mutlu olduğunuzu hissediyorum bazen. Hayatım boyunca benim için elinizden geleni yaptınız, her şey için, verdiğiniz tüm emekler ve gösterdiğiniz koşulsuz şartsız sevgi için çok teşekkür ediyorum.

Alessandro, I am just purely happy having found you in this life, and for years and years, walking side by side just means a lot to me. Ti amo. **Pera**, you are my everything in this life -and the most cutest and beautiful cat ever.
