Strategies to improve donation after circulatory death kidneys for transplantation

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 25 augustus 2021 om 16:15 uur

door

Leonie Harmina Venema
geboren op 29 februari 1988
te Groningen

TABLE OF CONTENTS

Chapter 1	General Introduction and aim	9
PART A	Unexpected donation after circulatory death (uDCD) donors	
Chapter 2	Factors that complicated the implementation of a program of donation after unexpected circulatory death (uDCD) of lungs and kidneys. Lessons learned from a regional trial In the Netherlands. <i>Transplantation 2019</i>	35
Chapter 3	Potential of unexpected donation after circulatory death programs defined by their demographic characteristics. <i>In preparation</i>	55
PART B	Improving and testing renal function with machine perfusion	
Chapter 4	Development of a porcine slaughterhouse kidney perfusion model.	79
Chapter 5	Effects of oxygen during long-term hypothermic machine perfusion in a porcine model of kidney donation after circulatory death. <i>Transplantation 2019</i>	105
Chapter 6	Impact of red blood cells on function and metabolism of porcine donation after circulatory death kidneys during normothermic machine perfusion. <i>In submission</i>	125
Chapter 7	The addition of 6-chromanol SUL-138 during hypothermic machine perfusion does not affect short-term renal function and injury of porcine donation after circulatory death kidneys. <i>In preparation</i>	149
Chapter 8	Metformin pre- and postconditioning to reduce ischemia reperfusion injury in an isolated <i>ex vivo</i> rat and porcine kidney normothermic machine perfusion model. <i>Clinical Transl Science 2020</i>	167
Chapter 9	Increasing metformin concentrations lowers its own secretion in both a rat and porcine <i>ex vivo</i> normothermic kidney perfusion model. <i>BMJ Open Diabetes Res Care 2020</i>	191
Chapter 10	General discussion and future perspectives	217
Chapter 11	Summary	240
	Samenvatting	244
	List of contributing authors	249
	Dankwoord	253
	List of publications	263
	Over de auteur	264
