# Acknowledgments

I want to thank everyone who contributed in one way or another to my PhD research. The order of appearance of people mentioned in the acknowledgment section does not indicate the importance of one's contribution. People are randomly listed without consideration of their impact on this work and me.

Prof. Dr. Syuzanna R. Harutyunyan, I am very grateful to you for taking me into your research group, for giving me complete freedom to do the research and projects I want. It means a lot to me. I was impressed by your presentation on TEDx about nanomotoring. Your ambitious projects like dearomatization or autocatalysis were very intriguing and challenging, and at the same time, attractive and inspiring. Thank you for your input in the development of my writing skills, presentation technique, research process, and scientific logic. It was very useful. I wish you endless inspiration, a lot of positive results, and remarkable scientific discoveries!

Dr. Liliia D. Kulish (Abdulaeva), I cannot find words to describe how much you mean to me. Yet, I will try. If you had not motivated me to continue my academic career, I would not have written this thesis. You supported me through the tough period of my life, when my mom passed away. Thank you for all of that. I do not think that I would cope with it without you. Thank you for helping me with writing papers and cheering me up, when my chemistry fails. It is important to have someone in your life, who understands you and motivates you to move forward in different aspects. I am very lucky to have you in my life.

My immediate family: Zinaida V. Kulish, Olga G. Samsonova, Victoria O. Zaytseva, Anton Zaytsev, Taisiia A. Zaytseva, Zinaida A. Abdulaeva, Damir F. Abdulaev, Ilmar D. Abdulaev, Alina D.
