ULTRASOUND OF DUPUYTREN'S DISEASE

AN IMAGE OF THE FUTURE

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 6 oktober 2021 om 16.15 uur

door

Sanne Molenkamp

geboren op 5 april 1989
te Danderyd

Promotor

Prof. dr. P.M.N. Werker

Copromotor

Dr. D.C. Broekstra

Beoordelingscommissie

Prof. dr. P.C. Jutte

Prof. dr. M. Maas

Prof. dr. J.H. Coert

Table of contents

1.	General introduction and outline of thesis	7
2.	Imaging for Dupuytren's disease: a systematic review of the literature	21
3.	Reliability and interpretability of sonographic measurements of palmar Dupuytren's nodules	49
4.	Echogenicity of palmar Dupuytren's nodules is not a predictor of disease progression in terms of increase in nodule size	71
5.	Echogenicity of Dupuytren's nodules is correlated to myofibroblast load and nodule hardness	87
6.	Early postoperative results of ultrasound-guided percutaneous needle fasciotomy in 451 patients with Dupuytren's disease	105
7.	The role of echogenicity of Dupuytren's cords in the prediction of early recurrence following percutaneous needle fasciotomy: a historical cohort study of 173 procedures in 141 patients	119
8.	General discussion	133
9.	Summary / Samenvatting	147
10.	Dankwoord, Curriculum Vitae & List of publications	157
