Acknowledgements

Time flies, and it has been 5 years since I came to the University of Groningen. I still clearly remember the tension, hesitation and surprise when I first set foot on the land of the Netherlands. Five years have passed, and everything has changed from unfamiliarity to familiarity, from familiarity to love, from love to not wanting to leave, from not wanting to leave to feeling nostalgic.

When I became a Doctor of Science, I experienced so much, and it made me stronger and tougher. It should have been an overwhelming joy. But as I recall my stories with each of you and write this part, I couldn't stop the tears from falling. I'm really sad to leave, I'm really sad to leave you all. The most important 5 years of my life were spent with you, and I am so grateful for your company.

First of all, I would like to thank my supervisor, *Dr. Graeme R. Blake*, for giving me the opportunity to pursue my PhD here. During these 5 years, I have been convinced and impressed by your excellent character, scientific discipline, and scientific dedication to perfection. This has had a profound impact on my research career, and I will continue to explore the mysteries of science by maintaining my scientific rigor and love for research.

Second, I would like to thank our group leader, *Prof. Beatriz Noheda*, for being a model of an outstanding female scientist and leading a team to become a very big achievement on an international platform. I admire your understanding of scientific research and your control of the subject, your questioning of science, your independence, and your rigorous approach to research, and you will be a role model for me in my life.

Thank you to my second mentor, *Prof. Maria A. Loi*, for your achievements in the field, which are greatly respected. You are a model of lifelong learning for me.

I want to give a lot of thanks to my technician *Jacob Bass* very much. In my heart you are omnipotent, and there are countless magical things hidden in your office that can solve all problems. You are a very friendly person I have met. Thank you for your help in my experiments. I cannot do without you in every experiment. As long as I see you in the office every day, even if you are not assisting me, I will feel very at ease. Thank you also for your help in life and encouragement in my thoughts. Every time I chat with you, I am very happy and I can gain a lot of knowledge. Maybe I trust you so much that you always "lie to me", but I enjoy it very much. I am very fortunate to have the help of an excellent technician like you.

Henk Bonder, the first time I saw you, a Chinese poem in praise of heroes came to mind, "Strength of the mountain is the strength of the world", I thought you were a man of strength, and you were. Thank you for your many, many help in fixing the European-style lock (you gave me a heart-shaped key and said this is suitable for girls), my glasses, moving, language problems and helping me go to the factory to buy labware. Here are many, many thanks to you.

Václav Ocelik, you are a very rigorous scientific researcher I have met, and your knowledge of electron microscopy has benefited me a lot and I am deeply respected. I have learned a lot of knowledge about morphological characterization from you. With your help, our publications have been successfully accepted. It is a pleasure to work with you.

Henriët van Mil-Boddeveld, Thank you for your help in my life at the University of Groningen, which made my studies and life at the University easier and less stressful.

Joshua, you are the first foreign friend I have made here, and the person I have said the most thank you for. For many of times in five years, I always felt that you were like my brother, and I was the younger sister. Thank you for teaching me many experiments. Thank you for your calm and mature help to analyze and solve one problem after another. Thank you for your kindness to China and your desire to understand China. Thank you for talking with you many times on ethnic, religious and cultural issues. Thank you for your encouragement and sincerity. Yvette, I hope you will enjoy a happy life with Joshua and thank you for looking at my Dutch summary!

Jordi, I don't know if you will remember me, because in my impression your memory just can keep only seven seconds, sometimes three seconds. But I will never forget you, never. I am extremely honored to share an office with you for three years. You are the one who helped me open the door to know the European world and taught me to fit in

here, you are the one who encouraged me when I was discouraged, consulted me when I was sad, and helped me when I was in trouble. I remember every conversation we had, every story (my diary helps me remember) and of course the many arguments. I'm sure you were my friend, and I know you were so kind and friendly, but every time I was "mean" to you, maybe I was afraid you would forget me. We were like two lower elementary school classmates, studying together and spending time together. Anyway, sharing an office with you is the best choice, thank you!

Sanne, you showed me the independence, bravery, and strength of a Dutch girl. Thank you for being very kind to me and making me trust you a lot, I am willing to share anything with you in life and work, listen to your advice and suggestions. Thank you for your help, encouragement and passion, very happy to be friends with you.

Silvia, you are a wonderful person and extremely easy to work with and it makes me very happy to be in the same office with you. You know me very well and when we hang out together you are always considerate and attentive, sharing funny stories with me, I am impressed by your kindness, independence, and bravery. We have shared our dream and hope you can realize it soon, thank you and wish you all the best.

Liany, we have participated in many international thermoelectric conferences together, and you have also provided me with a lot of help. The most memorable thing is your kindness, friendliness, and very delicious cakes and biscuits. I wish you a smooth graduation and a happy life in the Netherlands.

Ewout, we joined the group in the same year. At that time you were a shy and quiet undergraduate. After working together for 5 years, I saw more of your smiles and heard jokes from you. But your calmness and composure still left a very deep impression on me. Thank you for your help. It was a pleasure to meet you. You can definitely become an outstanding scientific researcher. I wish you success in scientific research.

Lily, you are a very caring friend I met. I am attracted by your fashion. I am very happy that we are sharing those interesting conversations, happy trips and unforgettable parties. Best wishes for you.

Mart, I feel like you are a very cool person, very smart and considerate, and has your own understanding and pursuit of life. It is a great honor to know you. Thank you for your help in my life and experiments.

Anil, my first research topic was developed with your help. Thank you very much for teaching me how to look at the exhibition and for your help in experiments. I wish you a happy life in the Netherlands.

Qikai (起开), please allow me to call you that. We met in November 2015, when we became online friends because of our common goals. Five years, you have become my most precious friend, thank you for your company, encouragement, help, reminders and consolation, although you often complain that you are like an old father who is so worried silk. I never predict my future with anyone, but I'm sure our friendship will not be washed away by time, I will always be "annoyed" with you. As we have joked countless times, our friendship is as strong as a comrade in arms, a prisoner. The paper is short and the friendship is long, and I think you understand that the part I didn't write. *Hui*, thank you for becoming my friend, thank you for your passion for me, I am very happy that we have the same views and opinions on many things, I appreciate your character and attitude towards matters. I wish you and *Qikai* a happy life, I believe we have much, much time ahead.

Yinfen, I have always admired your optimism and calmness, and your achievements in the field of research are inspiring, I wish you will success in scientific research. *Nick*, you are a person you can both love and hate, you usually treat me very well, but you always trick me, but I am very happy to meet you and I am very happy every time I talk to you. *Pavan*, I admire you for your achievements in research, you are an inspiring person, I am still impressed by the parties, movies, games and trips you have led, knowing you made me feel that research is also so interesting. *Silang*, although you are usually silent, your reports on FUNmeeting is impressive every time. I wish you all the best. *Cynthia*, I regard you as a very kind sister. When I was offended by other people, you came forward to help me out. I am very grateful and thank you for your consolation and encouragement many times, I am lucky to have met you. *Guowei*, you are the person I have ever met with the most friends. This is all because of your kindness. I am very happy to know you. *Jan*, I have always admired your love for life, thank you for sharing many beautiful photos, delicious food, and taking us on a driving tour. *Ruben*, under your serious appearance, you have a very gentleman's heart. Your cleverness allows you to make things simple. Your own opinions on many things are very respectable. *Jamo*, it was a pleasure working with you, I learned a lot about transmission electron microscopy and look forward to future cooperation. *Machteld*, you are a very good planning person I have met. Your thesis is very detailed, so I read it and read it. *Miguel*, thank you for bringing my gift from Mexico. I like it very much. I wish you have a smooth return to Mexico. *Arjun*, I hope I still have the opportunity to learn etching techniques from you. *Saeedeh*, you are one of the gentlest people I have ever met and I like you very much, your spirit of inquiry and dedication to science is admirable. *Monica*, the food you make is very delicious, you will be a very good

scientist. *Sepide*, you are a very interesting person. I wish you success in your research.

Siebe, Durjan, Tio, Koen, Jolle, Rick, Jelte, Diego, Evgenios, Michael, Vincent, Edwin, Winfried, Erik, Dagmar, Johanna, Tobias, Tamara, it was a pleasure to work with you, to party and to chat with you all.

Puhua, although I'm usually always "mean" you, but I know you have great promise, the future is bright, very happy to have you as a friend. I wish you can find someone who understands you and cares for you. *Xiaoli*, I am very happy to know you, in our countless conversations, I know you are the friend who is worthy of trust and deep friendship, we still have many, many time in the future. *Xukai*, you have always been an optimistic person also a very kind person, thank you for your encouragement and help, I wish you all the best. *Ping*, I envy you very much for having a lovely daughter you are a warm and kind person, wish you all the best for the next. *Weiteng*, thank you for your help and encouragement to me when I first arrived in the Netherlands, your humour, versatility and talent are very memorable, wish you have a bright future.

Blessings to my friends, *Si, Liqiang, Yuanyuan, Bingqi, Fangfang, Xi, Jingyuan, Jiahao, Jiacong, Minpeng, Yuru, Mengfan, Haoxiao, Yihang, Yangyang, Shuyan, Heng*, thank you for being part of my life.

我要把我最多的感谢送给我的父母。这 32 年来，你们不仅给了我生命，也给了我最好的生活条件。我知道我是你们的全部，你们对我的支持，鼓励，让我坚强的毫无担忧的走到今天。千言万语，我爱你们，我一定会成为让你们骄傲的孩子。
