**DIRECT COMPOSITE VERSUS
GLASS-CERAMIC ENDOCROWNS**
for mechanically compromised molar teeth

MAURITS DE KUIJPER

Funding

The research presented in this thesis was performed and funded by the Center for Dentistry and Oral Hygiene, University Medical Center Groningen, the Netherlands.

The research was additionally financially supported by a grant from the “Stichting Bevordering Tandheelkundige Kennis / Nederlands Tijdschrift voor Tandheelkunde”.

Direct composite versus glass-ceramic endocrowns for mechanically compromised molar teeth

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 13 oktober 2021 om 11.00 uur

door

Maurits Charles Franciscus Maria de Kuijper

geboren op 17 mei 1989
te Eindhoven

Promotores

Prof. dr. M.S. Cune

Prof. dr. M. Özcan

Copromotor

Dr. M.M.M. Gresnigt

Beoordelingscommissie

Prof. dr. L.A.M. Marks

CONTENTS

| | |
|---|------------|
| Chapter 1 General Introduction | 9 |
| Chapter 2 Clinical performance of direct composite resin versus indirect restorations on endodontically treated posterior teeth: a systematic review and meta-analysis | 21 |
| Chapter 3 Restorative choices of general dentists and endodontic specialists regarding endodontically treated posterior teeth: a survey study | 51 |
| Chapter 4 Survival of molar teeth in need of complex endodontic treatment: influence of the endodontic treatment and quality of the restoration | 69 |
| Chapter 5A Cyclic loading and load to failure of various types of large direct composite resin and indirect glass-ceramic restorations | 93 |
| Chapter 5B Cyclic loading and load to failure of lithium disilicate endocrowns: influence of the restoration extension in the pulp chamber and the enamel outline | 113 |
| Chapter 5C Influence of the ceramic translucency on the relative degree of conversion of a direct composite resin and dual-curing composite resin cement through lithium disilicate onlays and endocrowns | 131 |
| Chapter 6 Clinical performance of direct composite resin and lithium disilicate endocrown restorations on endodontically treated molar teeth: interim report of a randomized clinical trial | 155 |
| Chapter 7 General discussion and conclusions | 185 |
| Summary | 202 |
| Nederlandse samenvatting | 207 |
| Dankwoord | 213 |
| Curriculum Vitae | 221 |
