Propositions

Belonging to PhD thesis

Epidemiology of Periodontal Health

diagnosis, trends, and systemic relationships

1. There is a critical need for universally standardizing the definition of periodontal health to makes comparison with different studies valid. *This thesis*
2. Periodontal status of a tooth is more correlated to that of adjacent teeth compared to non-adjacent teeth. *This thesis*
3. Socioeconomic inequalities in periodontal health tended to enlarge in the Netherlands over the past two decades. *This thesis*
4. Individuals subsisting on a pro-inflammatory diet are more likely to have poor periodontal health. *This thesis*
5. A systemic biomarker of inflammation may mediate the associations between periodontal inflammation and cognitive function among older adults. *This thesis*
6. Concomitant presence of cognitive impairment and periodontitis/edentulism was associated with a higher risk of long-term mortality in the geriatric population. *This thesis*
7. Learn how to see. Realize that everything connects to everything else.
Leonardo da Vinci
8. Eind goed, al goed. (All's well that ends well.) *Dutch proverb*
9. 淡泊明志，宁静致远。(Simple for explicating one's ambition, quiet to go far.)
Zhuge Liang, a Chinese statesman
