# Acknowledgements

## Family

First of all, I would like to thank my parents **Roberto Armstrong** and **Maria de Fátima Carvalho Armstrong** for all the support in my life. I am extremely grateful for their love, prayers and sacrifices for educating and preparing me for life. Certainly, this thesis is the result of the wonderful education you have given me.

Moreover, I thank my grandmother **Maria Cicera Sales** (*in memoriam*) for the love and affection she always gave me. A great love of my life, forever in my heart. As I miss your sincere eyes and your sweet smile. Every moment we spent together is recorded in my heart forever, I will never forget the love you gave me. I miss you so much, but happy memories comfort me.

To **Ian A.C.B.F.**, whom I can't force myself to stop loving.

To my beloved girlfriend **Marina Vidal dos Santos**. You have been my constant source of inspiration. If the world makes me feel small, you make me a giant. Your presence, your hugs and everything else we do together bring me to life. You have no idea how better and more admirable life is when I'm in your presence.

## Friends and colleagues

Foremost, I would like to express my deep and sincere gratitude to my supervisors, **Dr. Ana Cristina Breithaupt Faloppa** and **Dr. Henri Leuvenink** for giving me the opportunity to do research and providing invaluable guidance throughout this research. I could not have imagined having a better advisor and mentor for my thesis. **Dr. Ana Cristina**, I appreciate for her patience, enthusiasm, motivation, and immense knowledge since my undergraduate research. For her, I am grateful to have introducing me to the incredible “estradiol world”. **Dr. Henri Leuvenink**, his

vision, dynamism and motivation have deeply inspired me. It was a great privilege and honor to study under his guidance.

Besides my supervisors, I would like to thank **Prof. Dr. Luiz Felipe Pinho Moreira**, a great master, his conversations and guidance, allowing me to get the necessary information I need to make this thesis possible.

I thank **Prof. Dr. Paulina Sannomiya** for giving me the first opportunity in the laboratory. Without her support, I would not have taken the first steps in research.

I would like to thank MSc.

**Fernanda Yamamoto Ricardo da Silva**, science and travel partner.

She joined me in this challenging journey to Groningen. I could not fail to thank you for showing me to KPOP, BTS and oriental culture in general.

I am very much thankful to my friend / brother **Dr. Cristiano de Jesus Correia (Sancler** for the intimate) for his support and friendship. Gratitude for everything you did for me. I thank my fellow labmates in School of Medicine of the University of São Paulo: **Raphael dos Santos Coutinho e Silva, Lucas Ferreira da Anunciação, Brunella Valbão, Mayara Ramos** and **Marcelo Souza** for the stimulating discussions and for all the fun we have had in the last years.

I express my deepest gratitude to UMCG lab colleagues, **Petra, Janneke, Tobias, Tim** and **Jacco** for their unfailing support and continuous encouragement. All Dutch colleagues were very friendly. **Ik zal Groningen voor altijd in mijn hart bewaren!**

## About the author

Roberto Armstrong Junior was born on December 23, 1990, in São Paulo / Brazil. In 2012, he initiated the Bachelor Degree in Biomedical Science at Centro Universitário São Camilo. In the second year of his graduation, started research activities at Laboratory of Medical Investigations 11 (LIM-11) - Laboratory of Cardiovascular Surgery and Pathophysiology of Circulation, at the School of Medicine of the University of São Paulo (FMUSP). In 2016, he joined the Graduate Program in Thoracic and Cardiovascular Surgery, under the supervision initially of Profa. Dr. Paulina Sannomya, and later with Dr. Ana Cristina Breithaupt-Faloppa to continue studying in the brain death research line. Seeking to expand knowledge, in 2017, he took his MBA in Strategic Business Management at FIAP (São Paulo / Brazil), with international extension in Innovation and Entrepreneurship at Babson College (Boston, USA). In 2018, joined the doctoral program at the Rijksuniversiteit Groningen (RUG) under the supervision of Prof. Dr. Henri Leuvenink. In February 2021, Roberto started his current job as Clinical Research Associate in the Clinical Unit of Cardiac Stimulation of the Heart Institute - HCFMUSP.
