# Interaction of Massive Stars with Gas Clouds in the Milky Way

From shooting stars to breaking bubbles

**PhD thesis**

to obtain the degree of PhD at the  
 University of Groningen  
 on the authority of the  
 Rector Magnificus Prof. Cisca Wijmenga  
 and in accordance with  
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 3rd December 2021 at 16:15 hours

by

**Ümit Kavak**

born on 16 February 1990  
 in Bakırköy, Turkey

## **Supervisors**

Prof. F. F. S. van der Tak

Prof. A. G. G. M. Tielens

## **Assessment committee**

Prof. J. Tan

Prof. G. J. Stacy

Prof. I. E. E. Kamp

To my family...

Cover design by: Yakup Kurt/Adgency Koeln. The background image on the front cover is a star-forming region known as LH-95 in the Large Magellanic Cloud taken from *hubblesite.org*. The interpretation of Starry Night on the back-cover and figures at the end of each chapter were provided by Garip Ay. The blue tulip created by Evren Kaan at page 220 was taken from *kulturportal.gov.tr* with ID of #8942.

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Interstellar Medium	2
1.2	Low and Massive Star Formation	3
1.3	Massive Stars	7
1.3.1	Jets and Outflows	9
1.3.2	Photodissociation Regions	10
1.3.3	Interstellar Bubbles	13
1.4	Feedback from Massive Stars	15
1.4.1	Mechanical Feedback	16
1.4.2	Radiative Feedback	16
1.5	Aims and Methods	18
1.5.1	Herschel Space Observatory	18
1.5.2	Very Large Array (VLA)	20
1.5.3	Stratospheric Observatory for Infrared Astronomy (SOFIA)	21
1.5.4	Meudon PDR code	22
1.5.5	RADEX	23
1.5.6	GILDAS	23
1.5.7	CASA	23
1.5.8	HIPE	24
1.5.9	Python Libraries	24
1.6	Goals of this thesis	24
1.7	Outline	25
<b>2</b>	<b>Search for radio jets from massive young stellar objects. Association of radio jets with H<sub>2</sub>O and CH<sub>3</sub>OH masers</b>	<b>29</b>
2.1	Abstract	29

2.2	Introduction . . . . .	31
2.3	Observations . . . . .	33
2.3.1	Selected sample . . . . .	33
2.3.2	VLA observations . . . . .	35
2.4	Results . . . . .	36
2.4.1	Continuum emission . . . . .	36
2.4.2	Spectral index analysis . . . . .	37
2.4.3	Maser emission . . . . .	41
2.5	Analysis and discussion . . . . .	41
2.5.1	Nature of the radio continuum emission . . . . .	42
2.5.2	Association with molecular outflows . . . . .	44
2.5.3	Association with EGOs . . . . .	45
2.5.4	Association with masers . . . . .	48
2.5.5	Radio-jet candidates . . . . .	48
2.6	Implications for high-mass star formation . . . . .	57
2.7	Summary . . . . .	58
2.8	Acknowledgements . . . . .	60
2.9	Comments on individual sources . . . . .	60
2.10	Catalog of the continuum sources . . . . .	72

### 3 Origin of hydrogen fluoride emission in the Orion Bar.

	<b>An excellent tracer for CO-dark H<sub>2</sub> gas clouds</b>	<b>109</b>
3.1	Abstract . . . . .	109
3.2	Introduction . . . . .	111
3.3	Observation and data reduction . . . . .	113
3.4	Results . . . . .	116
3.5	Analysis . . . . .	119
3.5.1	Column density . . . . .	119
3.5.2	Spatial distribution of HF . . . . .	122
3.6	Discussion . . . . .	124
3.6.1	Collisional excitation . . . . .	124
3.6.2	Infrared pumping . . . . .	129
3.6.3	Chemical Pumping . . . . .	130
3.7	Summary . . . . .	130
3.8	Acknowledgements . . . . .	131
3.9	Appendix . . . . .	133
3.9.1	SEDs of Three Positions in the HF map . . . . .	133

<b>4</b>	<b>Breaking Orion’s Veil bubble with fossil outflows</b>	<b>139</b>
4.1	Abstract . . . . .	139
4.2	Introduction . . . . .	141
4.3	Observations . . . . .	145
4.3.1	[C II] Observations . . . . .	145
4.3.2	Molecular Gas Observations . . . . .	147
4.3.3	Ionized Gas Observations . . . . .	148
4.3.4	Far-IR photometric observations . . . . .	148
4.3.5	Mid-IR Observations . . . . .	150
4.4	Results . . . . .	150
4.5	Analysis . . . . .	152
4.5.1	Expansion Velocity . . . . .	152
4.5.2	Morphology of the protrusion . . . . .	152
4.5.3	Expansion Timescale . . . . .	155
4.5.4	Line Profile Analysis . . . . .	155
4.5.5	Kinetic Energy and Momentum . . . . .	157
4.6	Discussion . . . . .	160
4.6.1	Persistence of fossil outflow cavity . . . . .	165
4.6.2	Ionizing source . . . . .	166
4.6.3	Correlation of Intensities . . . . .	167
4.7	Conclusion . . . . .	169
4.8	Acknowledgements . . . . .	170
4.9	Appendix . . . . .	170
4.9.1	Geometric correction Factor . . . . .	170
4.10	Additional Maps . . . . .	172
<b>5</b>	<b>Unveiling the Veil: Protostellar feedback in Orion</b>	<b>183</b>
5.1	Abstract . . . . .	183
5.2	Introduction . . . . .	185
5.3	Observations . . . . .	187
5.3.1	[C II] observations . . . . .	187
5.3.2	Molecular Gas observations . . . . .	189
5.3.3	Mid-IR observations . . . . .	189
5.3.4	Far-IR photometric observations . . . . .	189
5.4	Identification of Dents . . . . .	190
5.4.1	Position-velocity (PV) Diagrams . . . . .	190
5.4.2	High-velocity [C II] emission . . . . .	193

5.4.3	Line profiles . . . . .	193
5.5	Analysis . . . . .	194
5.5.1	Characteristics of the dents . . . . .	194
5.5.2	Origin of the dents . . . . .	196
5.5.3	Momentum of the dents . . . . .	196
5.5.4	Potential shock signature of the dents . . . . .	199
5.5.5	Collimation factor and opening angle . . . . .	201
5.6	Summary . . . . .	202
5.7	Acknowledgements . . . . .	203
5.8	Appendix . . . . .	204
5.8.1	Gaussian Fitting Results . . . . .	204
5.8.2	Massive Stars and Geometry . . . . .	204
5.8.3	PV diagram of the dents . . . . .	205
<b>6</b>	<b>Conclusions and Outlook</b>	<b>215</b>
6.1	Summary and conclusions . . . . .	215
6.2	Future Outlook . . . . .	218
