The Heart of the Matter: Discovery of new genetic loci for heart rate variability and its relationship with blood pressure and mortality

Balewgizie Sileshi Tegege

The research described in this dissertation was carried out at the department of Epidemiology at the university medical center Groningen. B.S. Tegegne received a Ph.D. scholarship of the University of Groningen.

The publication of this thesis was financially supported by University of Groningen, University Medical Center Groningen, Science in Healthy Ageing and healthcaRE (SHARE) Research institute, and Graduate School of Medical Sciences (GSMS).

**The Heart of the Matter: Discovery
of new genetic loci for heart rate variability and its
relationship with blood pressure and mortality**

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 6 December 2021 at 9.00 hours

by

Balewgizie Sileshi Tegegne

born on 14 July 1987
in Gojam, Ethiopia

Supervisors

Prof. H. Snieder

Dr. H. Riese

Co-supervisor

Dr. I.M. Nolte

Assessment Committee

Prof. S.M. Leal

Prof. J. Thayer

Prof. P. De Jonge

Elnaz Naderi

Sisay M. Alemu

Table of contents

Chapter 1	General introduction	9
Chapter 2	Reference values of heart rate variability from 10-second resting electrocardiograms: the Lifelines Cohort Study	23
Chapter 3	Determinants of heart rate variability in the general population: the Lifelines Cohort Study	31
Chapter 4	Spontaneous baroreflex sensitivity and its association with age, gender, obesity indices and hypertension: a population study	49
Chapter 5	Genetics and the heart rate response to exercise	67
Chapter 6	Heritability and the genetic correlation of heart rate variability and blood pressure in >29 000 families: the Lifelines Cohort Study	99
Chapter 7	Genetic loci associated with heart rate variability and the relationship with mortality	115
Chapter 8	Meta-analysis of genome-wide association studies for heart rate variability	151
Chapter 9	Summary, general discussion, and suggestions for future research	179
Chapter 10	Nederlandse samenvatting	206
	About the author	210
	List of publications	212
	Acknowledgments	214
	SHARE previous dissertations	218
