Dynamics of the salt marsh biomes in response to inundation

Diana Edisa García Hernández

The research presented in this thesis was carried out in the Microbial Community Ecology Group and the Conservation Ecology Group of the Groningen Institute for Evolutionary Life Sciences (GELIFES), University of Groningen.

Diana Edisa García Hernández received financial support from the Consejo Nacional de Ciencia y Tecnología (scholarship number 484425) and a top-up PhD scholarship from the University of Groningen. The printing of this thesis was funded by the University of Groningen and the Faculty of Science and Engineering of the University of Groningen.

Dynamics of the salt marsh biomes in response to inundation

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Tuesday 11 January 2022 at 16.15 hours

by

Diana Edisa García Hernández

born on 29 May 1988

in Mexico City

Supervisors

Prof. J. Falcao Salles

Prof. M.P. Berg

Prof. C. Smit

Assessment Committee

Prof. D. Bonte

Prof. J.T.M. Elzenga

Prof. E.E. Kuramae

Dedicada a mi papá, mamá, hermanas y sobrinas

Probably of all our feelings the only one that is not truly ours is hope.
Hope belongs to life; it is life itself that defends itself — *Julio Cortázar*

Contents

Chapter 1	General introduction	9
Chapter 2	Linking bacterial communities associated with the environment and the ecosystem engineer <i>Orchestia gammarellus</i> at contrasting salt-marsh elevations	33
Chapter 3	Salt marsh elevation drives root microbial composition of the native invasive grass <i>Elytrigia atherica</i>	67
Chapter 4	Ecosystem engineering interactions influence the response of bacterial communities to inundation in salt marsh soils	101
Chapter 5	A functional perspective of the interactions between ecosystem engineers and the microbiome of salt marsh soils in response to inundation	135
Chapter 6	Synthesis and general discussion	163
	References	183
	Summary	205
	Samenvatting	209
	Resumen	213
	Acknowledgments	221
	About the author	229
