Catalysis in complex media

Analytical approaches and mechanisms in manganese catalysed oxidations

Shaghayegh Abdolazadeh

university of
 groningen

faculty of mathematics
 and natural sciences

The work described in this thesis was carried out at the Stratingh Institute for Chemistry, University of Groningen, The Netherlands.

This work was supported financially by Ministry of Economic Affairs through the Stichting Technologie en Wetenschap (STW)

(Project No. 11059).

Catalysis in complex media

Analytical approaches and mechanisms in manganese catalysed oxidations

PhD Thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision of the College of Deans.

This thesis will be defended in public on

Friday 5 June 2015 at 16.15 hours

by

Shaghayegh Abdolahzadeh

born on 5 September 1983

in Babol, Iran

Supervisor

Prof. W.R. Browne

Assessment committee

Prof. J.G. Roelfes

Prof. E.M.J. Verpoorte

Prof. S.J. Bell

Table of Contents

Chapter 1

Introduction.....	2
Spectroscopy and electrochemistry of manganese complexes	4
Redox state dependent exchange of acetate and oxido ligands in multinuclear manganese complexes	6
Manganese catalysts in water oxidation reactions	15
Manganese catalysed disproportionation H_2O_2	18
Manganese catalysed dismutation of superoxide.....	28
Mechanistic studies in manganese catalysed alkene oxidation in organic solvents.....	29
Manganese catalysed oxidations involving in situ generation of catalysts from well-defined manganese complexes	30
Manganese aminopolypyridyl based oxidation catalysts	30
Manganese tmtacn based oxidation catalysts	32
Manganese catalysed oxidation of dyes in aqueous media (bleaching).....	35
Conclusions.....	37
Overview of thesis.....	38
References.....	39
Chapter 2	
Introduction.....	48
Results	49
Model reactions.....	49
Solid state Raman spectroscopy.....	50
Effect of surface pretreatment on drying pattern and Raman analysis.....	51
Raman spectra of compounds deposited on hydrophobic surfaces	52
Quantitative analysis	53
Distribution of compounds of differing solubility	54
Reaction progress monitoring by DCDR spectroscopy.....	55
Comparison of on-line vs. off-line (DCDR) methods	56
Use of DCDR in high-throughput screening of reaction conditions	57
Conclusions.....	58
Experimental	59
References.....	67

Chapter 3

Introduction	70
Results.....	72
UV/vis absorption spectroscopy and cyclic voltammetry in acetonitrile	72
FTIR spectroelectrochemistry in acetonitrile.....	73
Effect of carboxylic acids on UV/vis absorption spectroscopy and cyclic voltammetry.....	74
UV resonance Raman spectroscopy of 1 and 2 in acetonitrile	75
UV/vis absorption spectroscopy and cyclic voltammetry in water	76
pH dependence of the EPR spectrum of 1	78
Effect of bicarbonate on the speciation of complex 1 at pH 6 and pH 11.....	79
Effect of carboxylates on the speciation of 1 at pH 6 and pH 11	80
UV resonance Raman of 1 and 2 in water	81
pH and carboxylate concentration dependence of the spectroscopy and electrochemistry of 2	82
Oxidation of chrysin with H ₂ O ₂ catalysed by 1	83
Discussion.....	85
Conclusions	86
Experimental Section	87
References	91

Chapter 4

Introduction	94
Results.....	96
pH dependence of the absorption spectra of morin and chrysin.....	97
Photochemical stability of morin in the present of O ₂ and metal ions	97
Photochemical stability of Chrysin.....	101
Oxidation of chrysin with H ₂ O ₂ catalysed by 1	103
Discussion.....	105
Conclusions	107
Experimental.....	107
References	108

Chapter 5

Introduction.....	112
Results	114
Partitioning of catalysts.....	115
Distribution of styrene in aqueous phase	116
Monitoring oxidation of alkenes catalysed by complex 1	118
Oxidation of alkenes catalysed by complex 2	121
Oxidation of alkenes catalysed by 1 BARF.....	123
Oxidation of substrates under homogenous conditions.....	127
Discussion	128
Conclusions.....	127
Experimental Section.....	127
References.....	131

Chapter 6

Introduction.....	134
Results	135
Epoxidation of styrene sulfonate in the presence of citrate, borate, acetate and bicarbonate	136
Catalytic activity in water and bicarbonate.....	137
pH dependence of the catalytic activity of Mn ^{II} in water and bicarbonate (0.1 M).....	137
pH dependence of the catalytic activity of 1 in water and bicarbonate	141
Reactivity of 1 in aqueous bicarbonate	142
Comparison of the reaction rate with 1 and Mn ^{II} (SO ₄)	142
Effect of additives on the catalytic oxidation of chrysin with 1	143
Discussion	145
Conclusions.....	146
Experimental:	146
References.....	147
Perspective	149
Summary.....	151
Samenvatting.....	155
Acknowledgments	159
