## Dankwoord

Honestly, I have thought about how to write down the “dankwoord” many times during my power naps after lunch, nevertheless, I found this appears to be the most difficult part in finishing the whole thesis as it took me almost 2 hours to write the first sentence (no kidding). Time goes amazingly fast, I still could remember the day when **Vinod** picked me up at the university hotel and brought me to the department of Pharmaceutical Biology for the job interview, and all of a sudden, it has been four and half years since then. I feel that I am the lucky one because I have met many nice people during my time in Groningen and my families are always there for me. I would like to take this opportunity to thank you all.

First of all, let me give my best thanks to my promotors **Prof. Gerrit Poelarends** and **Prof. Wim Quax**, and my daily supervisor **Dr. Edzard Geertsema**. **Gerrit**, thank you for offering me the job to work in your group and also for your continuous support during these years. I have learnt a lot about enzymes and biocatalysis under your supervision, in addition to that, what I have learnt while working with you is how to be a real researcher and do solid research. **Wim**, thank you for your support during my PhD at this department, I really appreciate your comments during the work discussions and your kind suggestions to improve my presentation skills. Also thank you for preparing the recommendation letter for me. **Edzard**, thank you for guiding me throughout my PhD project on a daily basis, I have learnt a lot from you about organic chemistry and I think you deserve another PhD (in biocatalysis) regarding your contributions to this thesis.

In the meantime, let me take this opportunity to thank the members of the reading committee, **Prof. Marc van der Maarel**, **Prof. Frank Dekker**, and **Prof. Ulf Hanefeld**, for kindly accepting to read my thesis and also your corrections for my thesis.

Next, I would like to thank my nice, cool, smart and awesome colleagues on the 9<sup>th</sup> floor. Let me start from Gerrit's group: **Vinod**, you are the first person from this group that I met (even earlier than Gerrit). I really enjoyed the time working with you and the spicy chickens you prepared. Thank you for your kindness, help, and all the food and jokes you shared with us. **Ellen**, thank you for helping me all the time with my personal stuff (house moving, tax forms, interview advices etc.) and also for bringing me into the 4-OT world. I will not forget to clean the cuvettes and shut down the computers after use any more, now and forever. **Dr. Raj**, I am sorry dude that I really thought you were above 35 before you sent the email for birthday cakes on Nov. 22, 2010 saying that you were actually 29! Thank you for always enjoying my bad jokes, and you are welcome for that. I enjoy all the drinks and discussions we had, and to tell the truth, I also like your jokes and I envy your beard (not your hair). Thanks dude! **Anna**, my first impression about you before you tutored me how to express and purify MIF is, “you are so cool”, and my second impression after that is, “you are amazing”. Thank you for improving my protein purification and cloning skills, it is really nice to have you around in the lab and office. **Master Bert-Jan**, one of the a few things that I really regret is that I could not make the movie about your PhD life for you, which I promised. However, it will be the first

movie that I ever make if I could, by any chances, pursue my dreams to become a movie maker in the future. Thank you for all your support and inspiring suggestions during my PhD, I have learnt many things from you, not only the knowledge, but also the passion. Moreover, thank you for translating the Dutch summary for me, your Dutch is really good. **Mehran**, my friend, thanks for always being there and motivating me every now and then. Also thank you for sharing you expertise in molecular biology with me. And I really appreciate you and **Fatemeh** for often coming by and playing with Yuki and Miyu. I wish you all the best and good luck with your thesis. **Harsh**, I have to say though we hardly had any collaboration in research, we had so much happy time out of work. I believe that I have been to the cinema in Groningen with you even more often than with my wife, seriously no kidding. I am really impressed by your acting skills and truly admire your golden fingers. Thank you for proofreading my writings, letting me use your bench without cleaning it, and also for listening to my jokes. I wish you all the best with finishing you thesis and job hunting. **Jan-Ytzen**, every time when I hear what you are doing after work and during holidays (sailing, Frisbee, ice skating, cycling etc.), I feel very sad cuz my activity was mainly changing diapers for fun. I enjoyed all the fantastic discussions with you that are related and not related to work, and please forgive me if I might have said (I think I did) something which are not completely true just to impress you. Btw, thank you for the nice gift on the day I turned 30, which really made me famous. **Sabrey**, thank you for helping me with the organic chemistry experiments on the second floor. Wish you and your family all the best in Groningen. **Jandre&Marianne**, thank you for offering free taxi service, furniture delivery and assemble service, home repair service and so on. I look forward to meeting you in Olympic 2020.

I would like to also give my special thanks to the current and previous members who I have met during my time at Farmbio: **Pol, Gudrun** (Noch mal herzlichen Dank für die Hilfe beim Umzug!!!), **Robert** (I really like your family name), **Luis, Carlos, Dan, Elena** (thank you for all the lunch call), **Emanuele, Ingrid, Ingy, Linda, Putri, Christel**, I enjoyed all the seminars, lunch time, drinks and out-of-lab activities with you and thank you all for the nice atmosphere. **Remco**, thank you for “giving” me your bench and providing me with many useful information and tips for my job interview at DSM. Also my best wishes to the fresh PhD students: **Jielin, Zainel, Tjie Kok, Baojie, Zheng (Brenda), Magdalena**, good luck with your research and wish you all have a good time in Groningen.

How could I forget to thank our lovely and friendly technicians? **Pieter**, I believe there is no one else in this department who can make more and worse bad jokes than you, not even me. I respect you on that and I will never forget that thing that you put on my computer screen on that day (I still have the picture), that was brilliant man! Thank you for all your input in the chemistry part during my PhD research, I am sure that I could not finish my thesis without your hard work. **Rita**, to tell the truth, you are one of the kindest person that I have ever met. Whenever I need your help, the answer is always “sure, no problem”. I would like to thank you for all you great help in work and out of work. I am convinced that many more PhD students will enjoy working with you. **Ronald**, thank you for helping me with the

robot arm during my screening experiments. You have always been a problem-solver, it is so handy to have you around. And also thank you for giving me a lot of kids' stuff after Yuki was born, including you mum's microwave.

My sincere thanks to our sectaries **Yvonne** and **Janita**, you are the *guardians of Farmbio*, thank you for your support in all the paper works, arrangements and solving all kinds of problems that a foreign PhD student would have to deal with.

I also would like to acknowledge those students who have contributed to some of the work described in this thesis: **Pim** (where is my MIT T-Shirt?), **Alan**, **Maikel**, **Tiffany**, **Wolfram**, **Richard**, **Ildar**, **Niek**, **Robin** and **Getahun**, I really enjoyed the time with you all and have learnt a lot while supervising your thesis projects or practical courses. I appreciate your hard work that contributes to the results included in this thesis and wish you all the best with your future studies.

Daarnaast wil ik mijn burens in de Villapark flat bedanken voor hun steun tijdens ons verblijf in die flat. In het bijzonder wil ik mijn lieve buurvrouw **Puek** bedanken die de omslag van dit boek geschilderd heeft, bedankt voor al uw vriendelijkheid en hulp gedurende de afgelopen jaren, mijn familie en ik zijn erg blij dat we naast u hebben gewoond. Ik weet zeker dat Yuki en Miyu ooit naar Nederland zullen komen om u te bezoeken. **Jaap** and **LoAn**, thank you very much for your kind help in Groningen and also for sending us warm greetings during your holidays in Asia. **Kitty**, thank you for all your nice gifts to Yuki and Miyu, and for always tolerating the noise from upstairs (es tut mir leid). Vielen dank!

I wish to express my gratitude to many friends who I came across in Groningen, especially **Jeffrey&Mami**, **Jorge&Rei**, **Simon&Olga**, **May&Max**, and **Bingran**, I am really grateful for your kind help and support when my wife had the accident at home. Thank you and I look forward to seeing you again in the future.

Last but not least, I would like to thank my family for their unconditional support:

亲爱的老爸老妈，谢谢你们这么多年一尘不变的支持与付出，儿离家至今已近十年，尽孝不足，实感惭愧，然古语有云，男儿当志在四方，望在有生之年，能报答你们的养育之恩。

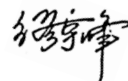

喜のお父さんと愛子お母さん、Take-san & Akiko、喜隆とかほる、今までいろいろありがとうございました、これからもよろしく願います。

Dear **Yuki** and **Miyu**, now you are still too young to read this, but one day you will grow up and you may want to read this (or maybe not interested?). I would like to let you know that, in the past 4 years, I had many frustrating moments and lost my motivation several times. But every time when I came home and saw you two were there waiting for me, I was recovered and I could keep going. You may not know it but you have largely contributed to this work, as both of you have witnessed this journey and you are the driving force behind me to finish this thesis. Thank you.

**Fumi**, thanks for always being there for me, preparing nice foods, taking good care of me and our kids, and also for tolerating my bad temper all the time. I have learnt many things from you including how to be a good husband, thank you for letting me realize those important things in my life. Ich liebe dich.

最后，谨以此书献给我亲爱的外公外婆，我时常会想起儿时和你们一起度过的那些幸福时光，愿你们在那个世界一切安好，永远怀念你们。

Toyama, Japan

March 2015

DANKWOORD
