The authors regret that the original graphical abstract contained an error by accident. In particular, the values of the OH density for the calcined SBA-15 and solvent-&-Fenton-treated SBA-15 were swapped. These values contradict the main message of the study. The values contained in the paper are however correct. In summary, the paper's

data are correct but the graphical abstract contained swapped data leading to a contradiction. Below, an amended graphical abstract can be found, as well as in the online journal website.

The authors would like to apologise for any inconvenience caused.

DOI of original article: <https://doi.org/10.1016/j.matlet.2014.05.173>.

Abbreviations: SBA-15, **Santa Barbara Amorphous-15** is an ordered mesoporous (all silica) material developed by researchers at the University of California at Santa Barbara.
