Acknowledgments

I wish to express my sincere gratitude to those people without whom it would not be possible to complete this thesis.

First, I would like to thank my parents, for their love, support, and guidance and to my siblings, who teach me not to give up. I want to thank the rest of my family (aunts, uncles and cousins) for all their support. Your display of affection, despite the physical distance, motivated me to keep working. I would also like to include my nieces and nephews, who always receive me with great joy and enthusiasm.

I would like to express my deep gratitude to my supervisor, Natasha. Thank you for your advice, guidance, for sharing your knowledge, for all your patient and support. Also, a special thanks for your help not only in work-related issues but also for helping me with personal situations, like getting museum tickets and places to visit. I really enjoyed working with you these years. I would also like to thank my co-supervisor Jan-Willem. Thank you for your support and sharing your experience during the conversations we have.

I would also like to thank my reading committee, Prof. T. Hortobagyi, Prof. T. van Laar, Prof. J. Buurke. Thank you for reading my thesis. I am honored to have you in my committee.

Thanks to all the colleagues I met during these years. Octavio, who help me even before we met in person, thanks for always being there with a piece of advice. To the people in the room V4.121, Dan, Mayra, Sebastian and Jaime. Thank you for your help, for the nice atmosphere and for all the jokes. To my colleagues at the Neurology department, Didin, Else, Franka, Gerrit, Jeffrey, Jeannette, Jonathan, Marieke, Marouska, Robbert, Sterre, Sygrid.
