Acknowledgments

It has been six months since I crossed the boundary of age thirty, an age of “而立”, when one should independently establish something. PhD was one of the important periods during these thirty years. I would like to take this opportunity to acknowledge the people who have supported me intellectually, mentally or in any other form or combination. I feel fortunate to have them as teachers, mentors, colleagues, schoolmates, friends and families. Without their support, accomplishing this thesis could be much more difficult.

First and foremost, I would like to thank my dear supervisor, **Tamalika Banerjee**. I have been in your group since my master project. I am really grateful to you in many aspects! To start with, you always have faith in me. Even when I doubt about myself. Thank you for giving me the opportunity to pursue my PhD degree in your group, Spintronics of Functional Materials. You are happy with every single little progress I have made. You are always sharp about the results which can be turned into a paper and encourage me to convert them to a paper. You were always available for a discussion. We had regular monthly meetings, to not only discuss science, but also my development as a researcher. I really appreciate your energy, time and the love you gave me. The discipline you engrave in me will also be helpful for the rest of my life. Your earnest attitude towards everything also touches me. In addition, you also manage the group to be lively, both scientifically and socially. I enjoyed the reading sessions you organized one summer and discussion sessions you evoked every now and then. You always send the latest interesting papers to motivate us. You also keep the group bonded socially by a lot of group activities. This becomes especially important during Corona time. To me, you are not only my supervisor. Sometimes, you are like a mom, who protects and cares from the heart. Sometimes, you are like a sister, with whom to share stress, happiness, and little secrets. No matter where I go and what I do in the future, I will surely have your support and blessing, which is very important for me. You also set a role model for me. I hope I can be as strong and brave as you in my future career.

Next, I want to express my gratitude to my second supervisor, **Bart van Wees**. Thank you a lot for allowing me to be part of the graphene flagship. I learned a lot from your critical comments during the discussions and your questions in the talks

during these years. Your deep understanding and intuition of physics are really impressive. Your passion for physics and your scientific and academic rigour also influences me a lot. Thank you for your guidance and support during my PhD.

Caspar van der Wal, thank you for managing Zernike Institute as a director in such an organized way. I found your speeches inspiring and motivating. Also, thank you and **Graeme Blake** for admitting me to top-master program, which I found of great quality.

Marcos Guimarães, thank you for all the discussions we had and your comments. All the best with your tenure track!

Thom Palstra, **Meike Stöhr**, **Wilfred van der Wiel**, thank you very much for being part of my reading committee and your valuable feedback. The comments are very helpful on improving the quality of this thesis and my understandings.

Thom Palstra, thank you also for the magnetism course you gave during Top Master. I enjoyed that course a lot. The first time I got to know complex oxides was during your lecture. You also offered me the opportunity to discuss with you after giving the report of this thesis. It was an enjoyable discussion.

Here, I would also like to thank **all the lecturers** during my top-master time. You prepared me with very solid knowledge for my research. Besides, I also learned a lot during the lectures about spintronics given by **Gerrit Bauer** in the beginning of my PhD. **Gerrit Bauer**, thank you also for the helpful discussions we had. Your curiosity and passion for science inspires me.

I have attended several conferences and workshops. I appreciate the interactions and discussions with many knowledgeable professors, among whom **Ivan Vera-Marun**, **Saroj Dash**, **Stephan Roche**, **Jaroslav Fabian**, **Mairbek Chshiev**, **Kevin Garello**, **Alexei Gruverman**, **Nicola Spaldin**, **Ramamoorthy Ramesh**, **Agnès Barthélémy**, **Philippe Ghosez**, etc.

I want to thank all my collaborators. **Biplab Sanyal** and **Xin Chen**, thank you for the important DFT inputs. It was a wonderful collaboration time. Your questions about the experimental results always gives me a better understanding. Your cheerful and supportive attitude was also important during the submission phase. **Biplab**, besides the academic achievements, you are also an artist: a photographer and a musician. I hope I have the opportunity to attend your performance once in the near future! **Xin Chen**, glad to hear that you started another academic voyage in Southern University of Science and Technology. All the best! **Daniel Sando**, **Bin Xu**, **Changsong Xu**, **Olivier Paull**, **Nagarajan Valanoor**, **Laurent Bellaiche**, thank you for this amazing collaboration on this amazing material, BiFeO_3 (BFO). We are in four different time zones. I appreciate you sacrificing sleeping time for our discussions. Thank you for contributing your world-class expertise in this work. **Daniel Sando**, I got to know you during ISOE. Your lecture slides are a very thorough introduction for me to BFO. Not only your wisdom, but also your lovely daughter's smile

have contributed very positively to our nice discussion. **Nagy Valanoor**, it was an inspiring discussion with you in the beginning of our collaboration when you came to Groningen. Thank you also for all your humours during the discussions and emails. **Laurant Bellaiche**, **Bin Xu**, and **Changsong**, thank you for your endeavor in interpreting the experimental data from the theoretical perspective. My understanding of the magnetic properties in BFO got deepened during every discussion. **Saeedeh**, thank you for the PFM measurements and discussions we had.

During my stay in Physics of Nanoscience group (FND), I always had kind administrative and technical support. **Johan (H)**, thank you for managing all the lab equipment and cleanroom. Due to your strict management, the lab is a safe environment for everyone. Although you can appear to be tough, you are actually warm inside and kind-hearted. Hans, you are always available for any problem I had, even during weekend. You are very reliable for any technical issue. Once, you stayed until eight in the evening to help me solder the out-of-plane stick for the Tesla setup! **Tom**, thank you for always solving our problems so promptly, the fruits from your own garden, and food you and your wife cooked. I want to visit the windmill where you are a volunteer one day. **Martijn**, thank you for all your training and help when I just entered FND. **Herman**, thank you for your electronic designs and your efforts in making MTJ masks. **Arjun**, thank you for maintaining EBL so well. It was always nice to have a casual chat with you in the corridor. It warms the moments. **Frits**, thank you for being in the technical team. **Anna**, **Andrea**, **Marleen**, and **Hilda**, thank you for your administrative support.

Next, I would like to continue to thank my colleagues and friends.

Ping, we spent our PhD time together, from the beginning to the end. I am so glad to know you are coming back for my defense. Your presence and support means a lot to me. We went together through difficult times, cheerful times, fun times, etc. We are “患难之交”. We shared our happiness and sorrows. We had so many memorable moments: traveling, cooking, HF etching, PLD, etc. Thank you for growing films and performing MPMS measurements for me. Your experimental skills are really reliable. You can give me any kind of support. When I was busy measuring, I could always go to your place and have some really delicious food. Your home is the best restaurant in Groningen. I feel so lucky to have you as my buddy. Also thank **Gang** for the cozy dinners and chats we had together. Of course, our little **Zhilan** is such a sweet angel and cheers us up to a great extent. I wish you a great success in your academic career and a happy life together with your family. In addition, become a rich woman!

Job, thank you for being my paranymph! Our friendship started when you came to our office as a master student. We had a very nice time together in Mainz. You are a very good explainer. It was a great pleasure to learn from you about music, football, Dutch, etc. We had a fun time learning Dutch and Chinese. Gezellig! Besides

Acknowledgments

the fun time, I also enjoyed to discuss with you. You have solid knowledge, good intuition and a modest attitude. Thank you for taking up the MTJ practicum. It was an unforgettable time that we fabricated and measured MTJ together. I also learned a lot from you when we were TAs for the MTJ practicum. You will soon take up the BFO project too. I believe you will have some great results. I hope you will have a fruitful PhD.

Tian, thank you for being my paronymph too! Your encouragement, friendship, and help are very valuable for me. You are always willing to share your fabrication experiences, which increases the success rate of my fabrication and reduces my disappointment a lot. Sometimes, the fabrication can be difficult and frustrating. We shared our emotion of failure very often, which makes the whole process more enjoyable. It was a pity that we did not manage to collaborate on one of the projects for a publication. I hope we can have other collaborations later in life. You are very warm-hearted and have a strong sense of justice. I also appreciate your reading ability and your broad views. Your rational analysis and opinions about different kinds of things is inspiring. All the best with your investment. **Dong**, also thank you very much for the nice dinners we had together. Your cooking reminds me of my hometown very much. We also share the same passion for cats. You are a very sweet person. I always feel at home when I go to your place. You got up at four in the morning to get the breakfast ready for us before we left for Schiphol. Thank you for the hospitality.

Road, thank you very much for your system guidance during my master project. The fabrication skills and knowledge I learned from you is very valuable. Besides, you are an excellent cook and programmer. Thank you for including me in the circuit training. It was really fun. Hope to visit you one day in Zurich!

Arijit, a tiger in the mountain now, who eats more grass nowadays. We had a nice time exploring 3T in MoS₂. Thank you very much for your time and support since then! You are always available for any discussion and advice. We had a nice time in Corsica together with Ping and Tamalika. There was a time that we were exercising together in the back of Zernike, running (walking to be exact) and bicycling, together with Ping. We have spent some memorable and lovely time together. Thank you also for all the tips you gave about job hunting. Good luck in your future career!

Anouk, thank you for being so helpful all the time! You are always so kind to give any help, ranging from MPMS measurement, cutting samples to grammar checks. Although you are very thin, your physical strength is great. We were perfect BHF etching buddies together. You are a top researcher, too. You are very intelligent and diligent. Your research topic is quite diverse, but you handle them very well and have a very thorough understanding. You care for not only the people around you, but also the whole ecosystem. The world needs more people like you for a prosperous future! We also share the same passion of loving cats, and we always

share all kinds of cat videos with each other. I hope you will have more time relaxing, preferably with your future cats.

Miina, Yahia, Elisabeth, Kaishu, Sayantani, I am happy to have had you as my students. Working together is such fun. **Elisabeth**, you gave a very nice talk for your symposium, and I am glad that our work got published. **Miina**, it was a great time working together. Your scientific reasoning and presentation skills are very strong. I treasure your friendship. Doing yoga with you was very relaxing. Unfortunately, we could not continue doing so during covid times. It was also fun to go to Tuinland, the second hand shop, vismarkt, etc. with you. I really enjoyed the time with you. It was very calming and relaxing. Thanks for coming all the way from Grenoble for my defense. I am excited to see you soon! I wish you success for your PhD. **Yahia**, I also enjoyed working with you. We started with the oxygen implantation project, which unfortunately did not work out in the end. You shifted your focus fast to the other project we had. You are a very efficient worker and have a strong curiosity. Everything in the lab can be your toy. It is very inspiring to discuss with you. Besides, you have a very broad interest: filming, comedian, baking. I really enjoyed your sense of humour during both work and off-work times. Thanks for your visit last November. It was very thoughtful. All the best to your PhD.

Arjan, we had a nice time in Las Vegas with Frank, traveling around. You have a passion for hot pot, and we had quite some of these nice dinners together. Thank you for all the nice deserts you made during group dinners. You are soft and sweet inside, in your own way.

Alexey, I cannot thank you enough for all your technical support and scientific discussions. You are a big help for everyone. You took a lot of group responsibilities. You have a big heart. Although you are very busy, you are always available for help and discussion. Our group was really lucky to have you. I hope you will enjoy Japan and have a great academic success.

Sid, thank you for all the scientific discussions. Your scientific inputs were important. You have very strong academic skills, which I admire a lot. I enjoyed our casual chats and dinners together, too. Next time, I promise to bake your pancake on the fire with improved skills. All the best with your career at ASML.

Juan, you were the reason why I joined FND. When I was looking for my master project, I was attracted by the project you introduced to me. Although I did not have your supervision in the end, unfortunately, I always enjoyed your explanation about spintronics. Your understanding and articulation of the topic is really amazing. Your wisdom about life also inspires me. **Lei**, thank you for your effort in bringing the PPMS to FND and improving the measurement program. I used it quite often in the later stage of my PhD. Thank you both also for the friendship. I enjoyed the dinners and games we played together. **Miaomio** is so cute and sweet. I hope to see her in person as soon as possible.

Acknowledgments

Jing, you are very strong, scientifically and personally. You can adapt to a new field very quickly. I admire your ability to become a master of any field. Thanks for helping me initialize the BFO SMR project and your encouragement. You manage work and life very well. Your extracurricular life is really rich and fun. I get inspired by you. I always enjoy chatting with you. Your way of looking at life, people, and world gives me a new perspective. Our trips and cooking times are also unforgettable. I look forward to our reunion after my defense, in Paris, with Ping.

Azminul, you have great passion for science. You always look cheerful and positively minded. You are our photographer all the time with your new phone, with a camera even better than Tamalika's. Haha! Thanks for all the nice pictures!

My office mates: **Anna, Freddie**, thanks for the nice time! **Anna**, it was nice to do yoga with you. We should do it again! **Freddie**, thank you for borrowing your speaker to me when I have to measure for a long time. It was really sweet. I wish both of you a great success for your PhD.

Julian, thank you for all your help in the cleanroom. I enjoyed the chats with you during the exfoliation and your music. **Pep**, thank you for giving your graphene flake to me when I just started, and all your suggestions and comments. **Eric**, you are a nice office-mate. I always impressed by your work efficiency. I still remember your timer and your swift pace. I wish you and Antonia a bright future. **Sander**, your strong scientific insight is really amazing! I wish I had learned more from you when you were working here. **Saurabh**, your defense was the first defense I attended here. The defense dinner and party were fun. Thanks for being so friendly during your time here. **Perihan**, it is nice to have you in the group. You are talented in handicraft. We really enjoyed the gifts you made for us, and your birthday lunch was amazing! **Eswara**, you are very concise and to the point. I wish you success in your academic career. **Subir**, you have left the group before I came, but your legend still remains. I met you in the graphene flagship workshop. Thank you for the discussions and chats. I also enjoyed my interactions and discussions with other (former) FND members: **Nienke, Ludo, Aisha, Geert, Xu, Frank** (thanks for being the driver in Las Vegas), **Jan** (thanks for sharing the stories about your chicken and tips for Blender), **Kumar, Christian, Jantje, Rick, Jakko, Sander (O), Obed, Jorge (Q), Weijia, Talieh, Mallik** (thanks for introducing me to python), **Madhu, Carmem, Sytze, Gerjan, Olger, Feitze** (thanks for asking me about my thesis every now and then), **Joop, Boxuan** (thanks for introducing me to the funny videos), **Rafael, Koichi, Jan Haverkamp, Cédric, Dennis** (thank you also for being helium filling buddies so many times), **Vincent, Atreya, Symen, Adam, Ishitro, Bart, Ruben, Hina, Alida, Frits (K), Wissem, Mihai**, etc. Not only your scientific discussions and comments, but also your friendliness are appreciated. I really enjoyed the casual chats with all of you in the corridor, labs, coffee room, group outings. I also would like to thank the HQ graphene team: **Niko, Paul and Rick (S)**. Thank you for providing us with 2D

materials. I wish your company a great success with more and extending business.

I continue my acknowledgement towards other wonderful people in the Zernike Institute. **Johan (K)**, thank you for the helium supply! You always tried your best to supply us with sufficient helium in time. Without your hard work, none of my work could have been possible. I also enjoyed the friendly chats with you. You are always cheerful. **Jacob**, thank you for all your technical support. You are always helpful. Once I needed your help with the helium. You drove to the campus, on your day off! Thank you for helping us move to Neptunusstraat, too! **Wigger**, it is very cheerful and warm to talk with you. *Vrolijk!* **André**, it was always nice to talk with you in Chinese. **Ricardo**, thank you for the friendly chats!

Qihong (陈大爷, 格村刘德华), thank you for all your help such as wire bonding, ionic liquid gating, and scientific discussions. I enjoyed our dinner parties. You can always have the most serious face but saying the funniest punchlines. It was difficult for me to judge whether you were making a joke or not. We enjoyed Karaoke and movies at your place a lot. Such fun time together with Jin and many other friends! **Jin**, you are very calming, sweet, smart and mature. You are a strong independent thinker, who distinguishes clearly right from wrong. I appreciate the virtue of you. I feel happy for you that you found a job that you really like, and for Sander which whom you can spend your life happily with. Thank you also for all the tips for the interview. **Qi**, you always have some interesting topics to talk about. I always enjoy chatting with you. You are very thoughtful. We enjoyed time with Mr. Nobel and your guinea pigs, chicken and of course cats. Miumiu also had a nice time with you.

Xiaoli, Puhua, Sasha, Ying, Minpeng, Qikai, Artem, Mart, it was nice time to work with you in clean room to share success and failure. **Pascal, Arunesh, Xiaotian, Heng Zhang, Ali&Liany, Guowei, Yanfeng, Yuru, Wen, Peiliang, Lijuan, Rongjing, Bin Chen, Xiaoshan, Hong, Jiquan&Zhonghong, Jing Li**, thanks for the casual friendly chats. **Jamo**, thank you for being so friendly and your tips regarding jobs and interviews. You really did a full research about it. Glad that you find a job that you really like. All the best. **Jorge (SR)**, you are very approachable and have a natural power affinity. I am glad you and Esme are enjoying a big farm in Columbia. Thank you for sharing your work experience. **Musty**, thank you for the friendly chats and all the information about the jobs. It was amazing to know that you also watched the journey to the west and know pinyin well. **Shuyan, Honghua, Artem, Herman, Karolina, Christian, Arjen, Teo, Insan, Bart, Simon, Vladimir, Martha, Dima, Joost**, thank you for the fun lunch break, fish Friday and other Maria's group activities. **Martha Bella**, I enjoyed the stay with you during Veldhoven. You are really hard working. I enjoyed the dinners with you a lot. Your food standard is very high. Thank you for introducing Gerardo and Toño to us. We should have more dinners together.

My pursue for a PhD was preceded by the Top Master Programme in

Acknowledgments

Nanoscience. I would like to thank all my classmates for the strong support and friendship. **Talieh, Jordi, Maikel, Maarten, Megan, Silang, Lianjia, Fangfang, Eugene, Misha, Foqia**, we formed a very close team and had fun organizing Nanosymposium, traveling to Schiermonnikoog, etc. Although we are now spreaded all across the globe, our bond is strong. **Lianjia**, the first week we were in Groningen, we lived together. We are quite different in certain sense, and quite similar in certain sense. The difference parts attract us together, and the similar parts make us understand each other very well. You are a very independent and creative person. I treasure your friendship all these years. We were studying online together during the corona time, which is a special memorable time. I hope you will find a fun job that you like soon! **Silang** (big boss), either you don't speak anything, or you amaze the people with a single brilliant feat. (不鸣则已, 一鸣惊人) You express yourself very directly even before the training of Dutch culture. I admire your ability of not caring about other's opinion. I got, much later, to learn that you are also very sweet. Thank you for the Christmas- and birthday-cards. They were very touching and warm. You have very amazing hobbies: 3D printing, crystal growth, screen printing. I enjoyed time with you playing overcooked and just dance. I will go to your big apartment to play with you in the near future. All the best with your new job and finishing up your thesis.

Besides my cohort, I also had nice interactions with multiple other top-master cohorts. **Xinkai**, we had a great time having pizza together and watching movies together. You have a very critical mind. It is always nice to listen to your arguments. **Dima**, it is nice to have you live nearby and have weekend visits and evening visits from you. **Tenzin**, you are so cheerful and positively minded. I appreciate the pieces of advice you gave me for the final stage. I would like to thank many more friends from the Top Masters programme, among whom: **Sasha, Natasha, Nilesh, Hendrik, Yuchen** (thank you for the lunchtime talks, which makes my food more delicious), **Azadeh, Henrieke, Qi Liu, Evgenios, Xuanbo, Chen Yao**.

I would like to express my gratitude towards my supervisors and group members for my top-master small project and research paper. **Ria Broer, Remco Havenith, Thorben Cordes, Jasper, Jochem**, thank you for your supervision and support. It was great to have our results published. **Giorgos, Jingyi, Michele, Artis, Jelle**, and many others, thank you for the nice time during my small project.

Besides my top-master friends from various cohorts, a very important person in the top-master program is **Karin**. You are always very cheerful and caring. I always enjoyed the chat with you. I hope the best for your new job.

I had a lot of nice dinners with various friends: **Jingjing Deng, Bin Jiang, Jiacong, Kaiyun, Jing Wu, Zhenchen&Shilin, Chongnan&Yuhan, Cui, Pulkesh, Jie&Honghua, Yanxi, Boqun, Puhua, Qingkai&Mengmeng, Lu Han, Chengyong Xiao, Qikai, JingJin&Xiaoyue, Yanfei, Ming Wen, Xukai, Huatang, Yuzhen& Xi-**

aoping, Bingqian. Thank you for the cozy evenings and your friendship. 感谢小华姐和晓东哥的精湛的剪发技术和美食！有你们真好！

Yuanyuan&Liqiang, thank you for the nice time we had together with the babies: **Youran** and **Xialin.** **Yuanyuan,** you are a really strong woman. I was impressed that you were still modifying your paper until late evening one day before you gave birth. You are always cheerful and positive. I really enjoyed discussing with you about life and work.

Marianna bella, you are very sweet and warm. Although we only met a few times, you are a big sister to me already, like you are to Wytse. Your daughter, **Elsa,** is so cute. I wish her a very happy life. **Paul, Machteld&Tom, Michiel, Herre&Maaike, Jan, Kartini,** thank you for extending your friendship from Wytse to me. We had a fun time gaming and gathering. **Japke,** thank you for all your pieces of advice for our animals.

Big cat traveling group (**Yichen Li, Nana, Xiaoying, Qiuqiu(Yingfen), Yang**), we have traveled all over Europe: Spain, Portugal, Norway, Switzerland. I really enjoyed all our trips and all our activities. **Chenbao (Yichen Li),** you gathered everyone in the group together and we turned out to match really well. You are an angel to us. Your amazing cooking was really enjoyable. I still remember the first Tiramisu we made together. Later on, we got our sweet kitties from Da. You got the big sister **Biubiu** and I got the younger sister **Miumiu.** Thank you for helping me take care of her for more than two months. I feel happy for you that you found your husband **Haoqi.** **Haoqi,** please treat our treasure girl nicely. I enjoyed kisses with you, **Nana,** and **Qiuqiu.** **Nana,** I remembered we were looking for a house together to move in, which unfortunately did not work. I really appreciated your short stay in our house in 2020. It was like a dream come true. I remembered one of the games said we are a good match. (forgot the details, only remembered the conclusion) I wish we were housemates for a longer time. Congratulations on finding a boyfriend (格村彭于晏). I can see that you two match very well according to the game overcooked. Really happy for you! **Xiaoying(少爷),** you were really caring and sweet during the trips. Thank you and **Yang** for carrying the heavy things all the time! I hope we can travel together again!

Bicycling Group on Saturday (**Ming Shi, Zhiwen, Bohuan, Yichen Liu, Chengtao, Xiaodong**), thank you very much for the nice biking time, dinners, trips, and deep discussion. The name does not say much, as we only biked once to the sea. I enjoyed our discussions about life, Chinese medicine, technology, Buddhism, etc. **Ming,** you are a big brother and take care of everyone. We always get some packed food from you whenever we go. **Yichen (Liu),** I enjoy the way and content you talked, the food you cooked, and the song you sang. Thanks for being my online GP sometimes. I hope in the future, your dream of having a Chinese medicine Yangshengtang and improving the health of people come true. If not, then try to realize

Acknowledgments

the dream of Langya potatoes. **Zhiwen**, you have all kinds of skills: cutting hair, cooking, sporting, etc. You always made sure everyone's bowl is full. **Chengtao**, you are the one who always came up with a difficult question. **Bohuan**, as a mathematician, you have a special view of looking at things. **Xiaodong**, you can always naturally transit the topic.

Eat Eat Eat Group (**Xiang, Wensi, and Jing**), we had a lot of dinners together as the name suggested. Besides, we also taobaoed together, camped together, sang together. **Xiang**, you are a terrific baker and pastry maker. You satisfied our stomach greatly. We are spoiled with all kinds of cakes you made. You are always sweet and lovely to me. Whenever you feel that I might be down, you will visit me with nice gifts and delicious food. All the best to the marriage of Thomas and you soon. **Wensi**, we regularly had our lunch breaks together after Yalan introduced us to each other. Your traveling experience is really amazing. The only places you have not been to are the south pole and the north pole. Thank you for all your encouragement about my job hunting. Thank **Jeroen** for being the driver and being the cat during Wytse's defense party. You are a great comedian. Your act and speeches were very funny.

Yalan 小天使, we had a great time during my master when we were neighbors in Esdoorlaan. The traveling to Barcelona was really enjoyable with you. Thanks for visiting me when you came back to Europe and we had a beautiful time in Luxembourg. Thank you for your friendship.

Hebei group (**Connie, Ming Shi, Ling Wang, Wita, Jin Zhu, Anqi, Shengjie**), thanks for the wonderful lessons we had together and inspiring discussions. **Connie, Ming Shi**, thanks for the organization.

Next, I want to thank all my dear housemates. **Fangfang, Yanan, and Yingfen**, we were really like a family. We were taking turns cooking and brought food every day. We had a lot of unforgettable time: watching movies, cooking, chatting, horse riding, etc. You made my PhD time very colorful. I think we spontaneously aligned some of each other's hobbies, interests, and habits in the end. One thing for sure: we all love Miumiu very much. **Fangfang**, the first picture I saw of you was on Renren. We came together for our top-master interview. We(缘分) are tightly bonded since then. I still clearly remembered the time we studied until very late together before the exams, went to the library together, went to Vismarkt together. We were as one back then. You had a lot of skills. You helped me fix the tire of the bike in the big wind. We were sitting on the ground having the chicken soup you made with the mushroom you brought from your hometown. Our binding was then even tighter after you moved into the same house as me. We experienced a lot of things, which strengthened our friendship more and more. You are very genuine, lovely, always thinking of others first. Everyone loves you once they know you, especially my parents. You are their extended daughter. I believe nothing can diminish our friendship ever. I am really happy that you like your new job very much. I still

have not had the chance to see the adorable Dafu. I wish to visit you soon after my defense. **Quan**, thank you also for the nice time we had together, in Paris, in Groningen, and in London. I hope you will have a lot of happy family time in the future. **Yanan**, during the first meeting we had at your previous house, Yingfen and I were a bit overwhelmed by your strong personality. Later on, we found you very lovely, easy-going, and caring. I also learned a lot of making-up skills and skincare knowledge from you. You can also make all kinds of delicious food and find all kinds of snacks. We always had your homemade spices in stock when you were here. You can also magically tame Miumiu. She liked to stay on your lap for so long! You always took care of Miumiu when I was away, and you always spoiled her with a lot of snacks. I admire your confidence and enthusiasm for science. I hope you will have a bright academic future. **Qiuqiu (Yingfen)**, you attract people naturally. When we went to Spain, the green skirt girl was catching one guy's attention, and we always teased you with this story. Whichever group you go to, you always become the big source of happiness (开心果) in that group. I really love your big dimple when you smile and the sound is also infectious. You are always devoted to your work and hardworking. You really deserve what you have achieved today and I am sure you will continue the glory. I enjoyed every trip we had together: Spain, southern France, and the Alps. They were really wonderful and fun. I am sure we will have many more wonderful times together in the future. It was difficult for me to see you leave the house one by one, but I am sure our friendship will tie us together tightly and we will meet somewhere in the world as the world is round. **Xiangyang** and **Xiao Jing**, thank you for the nice time we had in the house. **Xiangyang**, You are really enthusiastic about traveling. At the beginning of your PhD, you traveled several times per month. I was surprised by how energetic you were and felt old. You are persuasive. You managed to persuade me to buy several things as if you are the seller. You will probably sell your paper well! I am glad you have achieved so far and all the best with your academic career. Thanks for taking so many nice photos. This skill will add a lot of points for you for your future girlfriend. **Xiao Jing**, thank you for being so supportive and thoughtful. Often, you come back late in the evening, make some food such as fruit salad, and bring it into my room. Then we chat about the experiment, news, colleagues. I really enjoyed such moments. You always do a lot and complain so little. You take care of the house in a sweet way. I really like the dried flower collection you selected. You have good taste. If I am busy or feel down, you often either cook me something or bring something nice to eat. I really appreciated that.

My dear 219-C roommates, **Yuan, Wanru(qiuyue), Yu**, it is amazing that all four of us did PhD in four different fields. Once I succeeded in my defense, we will all be doctors. Thanks for your encouragement. We will continue to cheer each other up for the rest of our life. **Yuan**, thank you for being such an incredible friend and

Acknowledgments

being there all the time! It was such a blessed gift that we could still travel together in Europe so easily. I hope we can travel together to more places and spend a lot of time together. Long live our friendship! Xiaxia, you are really lucky to have her and I am jealous!

Henk en Willy, bedankt voor de gezellige tijd, *gatherings* en etentjes. I always hear about the nice time Wytse spent at your place during his childhood. Thanks for raising Wytse well!

My extended family in Netherlands, **Wybren, Ineke, Anne-marijke, Nienke&Jelmer, Belinda&Tjalling, Rebecca&Sjouke**, dank jullie allemaal dat jullie een familie voor me zijn. Although I am away from hometown, I can still feel the warmth of home. Bedankt voor alle leuke tijd samen; Terschelling, skivakanties, reizen naar China. Jullie zijn al die jaren een grote steun geweest in allerlei opzichten: verhuizen, huisinrichting, Nederlands, het rijbewijs, juridische zaken, etc. Ik prijs me gelukkig dat Wytse uit zo'n warm en lief (*sweet*) gezin komt.

My dear Wytse sweet guai, I could not have done this thesis without your continuous support and love! Thank you for all your technical and linguistic support! More importantly, you always believe in me. You can always find all kinds of ways to cheer me up. When I have some achievement, you are even happier than I am. I feel we are destined to be with each other. We have countless happy moments and experiences. We enjoyed making LEGO models, walking with our kitties after dinner, growing plants, watching one piece together, cuddling kitties, traveling around the world, etc. We do have time when I felt this might be the end of us. However, when we faced the problem together, we believed we could make changes and rescue our relationship. Love is also an important practice in life. We learn about understanding, difference, and tolerance. What is more, we share the same visions about a future home, where the families live together happily with all kinds of animals. I hope we will be each other's unchangeable constant in this rapidly changing world.

最后，我要感谢我爱的亲友们。亲爱的老爸老妈，感谢你们养育我长大，又给予我充分的自由来选择学业，事业，爱情。你们无尽的支持和鼓励是我勇往直前的力量源泉。你们无条件的爱给了我避风的港湾，使我失意的时候不至于迷失自我。美好充满爱的童年将治愈我在未来道路上可能会受的伤。谁言寸草心，报得三春晖。我还要感谢我的爷爷，姥爷，姥姥，感谢你们给了我无尽的宠爱，好想你们。感谢亲友们的疼爱。我将继续努力。

Thanks everyone! Bedankt iedereen! 谢谢大家!
