Rational drug design in photopharmacology

Piermichele Kobauri

First edition, May 2022

The work described in this thesis was carried out at the Stratingh Institute for Chemistry, University of Groningen, The Netherlands.

**rijksuniversiteit
 groningen**

The work was financially supported by the EU Horizon 2020 program (ALERT co-fund No. 713482).

Rational drug design in photopharmacology

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. C. Wijmenga
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

dinsdag 3 mei 2022 om 11.00 uur

door

Piermichele Kobauri

geboren op 23 oktober 1991
 te Turijn, Italië

Promotores

Prof. dr. B.L. Feringa

Prof. dr. W.C. Szymanski

Beoordelingscommissie

Prof. dr. M.J. Fuchter

Prof. dr. M.T.C. Walvoort

Prof. dr. P.H. Elsinga

To my parents, who brought me into this world but had to leave earlier

Table of contents

Chapter 1 – Informed design in photopharmacology with <i>E/Z</i> molecular photoswitches	1
1.1 Introduction	3
1.2 Molecular design in photopharmacology	6
1.3 Analog design	7
1.4 Hit identification	103
1.5 Conclusions and outlook	106
1.6 Aim and outline of this thesis	108
1.7 References	109
Chapter 2 – Application of computational methods in photopharmacology	121
2.1 Introduction	122
2.2 Structure-based design of a photocaged MDM2 inhibitor	123
2.3 Toward the rational design of photochemical probes for cGAS	126
2.4 Rationalization of the light-controlled inhibition of BRAF ^{V600E} kinase with molecular docking	128
2.5 Azobenzene-based amino acid linker for polyglutamate (polyQ) aggregation	130
2.6 Rational design of a photowitchable DNA glue	132
2.7 References	143
Chapter 3 – Hypothesis-driven, structure-based design in photopharmacology: The case of eDHFR inhibitors	149
3.1 Introduction	150
3.2 Results and discussion	152
3.3 Conclusions and outlook	167
3.4 Acknowledgements	169
3.5 Author contributions	169

3.6	Experimental section	169
3.7	References	254
Chapter 4 – Biaryl sulfonamides as (Z)-like azosteres for photopharmacology		261
4.1	Introduction	262
4.2	Results and discussion	262
4.3	Conclusions and outlook	267
4.4	Acknowledgements	268
4.5	Author contributions	268
4.6	Experimental section	268
4.7	References	290
Chapter 5 – Benzophenones as (Z)-like azosteres for photopharmacology		293
5.1	Introduction	294
5.2	Structural search and azologization of circadian clock regulators	295
5.3	Photoswitchable analogs of ketoprofen	297
5.4	Acknowledgements	304
5.5	Author contributions	305
5.6	Experimental section	305
5.7	References	319
Chapter 6 – Toward the calculation of light-induced differences in binding affinity with umbrella sampling simulations		323
6.1	Introduction	324
6.2	Results and discussion	325
6.3	Conclusions and outlook	329
6.4	Acknowledgements	329
6.5	Author contributions	330
6.6	Experimental section	330
6.7	References	334
Chapter 7 – Appendices		339
7.1	Summary	340
7.2	Samenvatting	342

7.3	Popular summary	344
7.4	Populaire samenvatting	345
7.5	Acknowledgements	346
