# Prolonged preservation of donor livers: the benefits of hypothermic machine perfusion

## **Proefschrift**

ter verkrijging van de graad van doctor aan de  
Rijksuniversiteit Groningen  
op gezag van de  
rector magnificus prof. dr. C. Wijmenga  
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

maandag 16 mei 2022 om 11.00 uur

door

**Isabel Margaretha Antoinette Brüggewirth**

geboren op 21 januari 1994  
te Utrecht

**Promotores**

Prof. dr. R.J. Porte  
Prof. dr. J.A. Lisman

**Copromotores**

Dr. V.E. de Meijer  
Dr. P.N. Martins

**Beoordelingscommissie**

Prof. dr. J.K.G. Wietasch  
Prof. dr. B.M. Bakker  
Prof. dr. I.Q. Molenaar

# TABLE OF CONTENTS

<b>Chapter 1</b>	General introduction and aims of this thesis	9
<b>Part 1: The limits of static cold storage preservation</b>		
<b>Chapter 2</b>	Donor diabetes and prolonged cold ischemia synergistically increase the risk of graft failure after liver transplantation. <i>Transplantation Direct 2018.</i>	21
<b>Chapter 3</b>	The retransplantation risk score: a prognostic model for survival after adult liver retransplantation. <i>Transplant International 2021.</i>	37
<b>Part 2: The benefits of hypothermic machine perfusion</b>		
<b>Chapter 4</b>	Machine perfusion: cold versus warm, versus neither: update on clinical trials. <i>Seminars in Liver Disease 2020</i>	63
<b>Chapter 5</b>	Oxygenated flush out and storage of DCD porcine livers – an experimental study. <i>Artificial Organs 2021</i>	95
<b>Chapter 6</b>	Dual versus single oxygenated hypothermic machine perfusion of porcine livers: impact on hepatobiliary and endothelial cell injury. <i>Transplantation Direct 2021</i>	115
<b>Chapter 7</b>	Extended hypothermic oxygenated machine perfusion enables ex situ preservation of porcine livers for up to 24 hours. <i>JHEP Reports 2020</i>	137
<b>Chapter 8</b>	Prolonged preservation by hypothermic machine perfusion facilitates logistics in liver transplantation: a European observational cohort study <i>American Journal of Transplantation 2022</i>	161

<b>Chapter 9</b>	A prospective clinical trial to assess safety and feasibility of Prolonged Hypothermic Oxygenated Machine Perfusion preservation (DHOPE PRO trial) in Liver Transplantation: <i>Interim analysis with first results.</i>	185
<b>Chapter 10</b>	Summary, general discussion & future perspectives	203
<b>Appendix I</b>	Prolonged dual hypothermic oxygenated machine preservation (DHOPE-PRO): study protocol for a prospective, non-randomized, dual-arm, feasibility trial. <i>BMJ Open Gastroenterology 2022</i>	217
