# **Exploring next-generation sequencing in clinical microbiology**

Identification, characterization and typing of pathogens

**Nilay Peker**

Funding: This PhD project has received funding from the European Union's Horizon 2020 Research and Innovation Program under the Marie Skłodowska-Curie grant agreement 713660 (MSCA-COFUND- 2015-DP "Pronkjewail") and The Beatrixoord Noord-Nederland Foundation.

Funded by the Horizon 2020  
Framework Programme of the  
European Union

Stichting  
Beatrixoord  
Noord-  
Nederland

This PhD project was performed at the Department of Medical Microbiology and Infection Prevention of the University Medical Center Groningen, University of Groningen, The Netherlands.

# Exploring next-generation sequencing in clinical microbiology

Identification, characterization and typing of pathogens

**PhD thesis**

to obtain the degree of PhD at the  
University of Groningen on the authority of the  
Rector Magnificus Prof. dr. C. Wijmenga  
and in accordance with the decision by the College of Deans.

The thesis will be defended in public on  
Monday 23<sup>rd</sup> May 2022 at 9:00 hours

By

**Nilay Peker**  
born on 18 March 1987  
Gazipaşa, Turkey

## **Promotor**

Prof. B.N.M. Sinha

Prof. J.W.A Rossen

## **Copromotor**

Dr. N. Monge Gomes do Couto

## **Assessment Committee**

Prof. J. M. van Dijn

Prof. P. Savelkoul

Prof. J. Schrenzel

***To children around the world***

## **Paranymphs**

## Content

<b>Chapter 1</b>	General introduction and scope of the thesis	<b>p.9</b>
<hr/>		
Part I.	Molecular Diagnostic in Clinical Microbiology	
<b>Chapter 2</b>	Diagnosis of bloodstream infections from positive blood cultures and directly from blood samples: recent developments in molecular approaches	<b>p.25</b>
<hr/>		
Part II.	Whole Genome Sequencing	
<b>Chapter 3</b>	Evaluation of whole-genome sequencing data analysis approaches for both short-read and long-read sequencing of <i>Mycobacterium tuberculosis</i>	<b>p.55</b>
<hr/>		
Part III.	Targeted Metagenomics Sequencing	
<b>Chapter 4</b>	Evaluation of an accelerated workflow for surveillance of ESBL (CTX-M)-producing <i>Escherichia coli</i> using amplicon-based next-generation sequencing and automated analysis	<b>p.89</b>
<b>Chapter 5</b>	A Comparison of three different bioinformatics analyses of the 16S–23S rRNA encoding region for bacterial identification	<b>p.103</b>
<hr/>		
Part IV.	Shotgun Metagenomics Sequencing	
<b>Chapter 6</b>	The future potential of metagenomics in clinical laboratories	<b>p.133</b>
<b>Chapter 7</b>	Whole blood or plasma? Shotgun metagenomics-based diagnosis of bloodstream infections using long read MinION sequencing	<b>p.159</b>
<b>Chapter 8</b>	Host DNA depletion can increase the sensitivity of <i>Mycobacterium abscessus</i> detection through shotgun metagenomics in sputum	<b>p.181</b>
<hr/>		
<b>Chapter 9</b>	General Discussion	<b>p.203</b>
<b>Appendices</b>	Summary Nederlandse Samenvatting Acknowledgements About the author	<b>p.219</b>
